

This document outlines all the details about a particular career/occupation. For each career/occupation the document lists the name of the occupation, the field, the required educational qualifications, work environment, job opportunities etc in a standard tabular format as shown below in the Directions Table. Each of the other tables contain details of a particular career/occupation.

Item	Description	Possible Answers
Occupation	Name of the occupation or profession. Please provide most commonly used layman term	
Field	Provide details of industry or job type (Corporate Role, Public Servant)	
Required Educational Qualification or Certification	List of educational requirements and certifications required (License to operate)	
Role Objective/ Tasks	What is the function of this role in an organization	
Work Environment	Is the work environment harsh (Like construction/Mining) or Normal like schools, hospitals, corporates etc	
KSAOs	What Knowledge, skills, abilities and other attributes are required to do the role competently?	
Industries that typically hire such skills	What sort of organizations hire for these roles?	
Fixed work hours?	Fixed no. of hours v/s frequent requirement for stretch and long hours- teacher v/s software engineer	Fixed, Fixed with some overtime, Frequent overtime
Day job or work in shifts	Is there a frequent requirement to work in shifts? Teacher v/s nurse	Day Job, Shifts
Social Standing of role	Does this job command respect in the society- IAS/IPS/Teacher/Police v/s manager in a corporate	High/Low/Medium
Impact on society	Does this role have a direct impact on the society- teacher v/s software engineer	High/Low/Medium
Availability of job opportunities (Current/Future)	Is this a niche job that is does not have several role opportunities ? E.g. digital marketeer	Niche/Common
Reference link for more details	If there are specific sites for more details on this occupation	
Location	Is this job available in the locally or does the person need to relocate to a nearby town/city? Teacher/nurse v/s software engineer Also, mention if the job is a transferable job- police, teacher	Relocation required, Local options available, transferable job
Travel	Is the role behind the desk (software engineer), requires moving around in a building (nurse, factory worker), requires travel in the town (salesman, police), requires travel across states/towns (some sales and corporate jobs)	Desk job/Active in premises/Local travel/ Travel across cities/towns
People/Customer facing role	Does the role require the person to work in a team setting or largely independently, or does the role require the person to deal a lot with people (police, nurse)	Yes/No
Skill focus- People or Cognitive skills	Tied to the previous question, is people skills or cognitive skills more crucial for success in this role (SW engineer v/s HR manager)	People Skills, Cognitive skills

Number of 0
Professions

Occupation	Horticulturist
Field	Agriculture
Required Educational Qualification or Certification	High school diploma; an associate's degree in horticulture is recommended for advancement College courses include: Level 1 Award/Certificate in Horticultural Skills Level 2 Certificate in Gardening Level 2 Certificate/Diploma in Horticulture
Role Objective/ Tasks	As a horticultural worker, you would be involved in growing plants for: 1) garden centers - producing plants for sale to the public 2) parks and gardens - looking after amenity areas such as private or public historic or botanic parks, gardens and green spaces 3) production horticulture - researching seed and plant development, and producing plants for the food, gardening and floristry industries 4) Depending on the job, you could also pick, sort and package produce to be sent to retailers, sell plants and other products, and advise customers in a garden center
Work Environment	Normal - Indoor or Outdoor depending on the work assignment. A variety of work environments (offices, production fields, greenhouses, laboratories) . Your work would be physically demanding, involving bending, lifting and carrying
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1. sowing seeds and planting bulbs and ornamental plants 2. growing plants from cuttings and by grafting 3. taking care of plants - watering, weeding, pruning, feeding and spraying 4. mowing grass, cutting dead growth and branches, and general tidying 5. laying paths and looking after ornamental features 6. researching new strains of seed and plants in the lab for crop production. 7. ability in maths and science for certain roles 8. the ability to understand and follow health and safety regulations 9. the ability to work either alone or in a team 10. customer service and money handling skills for garden center work
Industries that typically hire such skills	- Jobs in amenity horticulture are mainly in larger towns and cities, working for local councils, looking after public parks, gardens and playing fields. - With experience you could set up your own nursery or garden maintenance business. - Horticultural research jobs are likely to be found in universities, and with food and agricultural development companies. - In larger organizations, you may have the chance to progress to supervisor and manager jobs once you have experience or further qualifications.
Fixed work hours?	You would usually work a 40-hour week, although some jobs are seasonal, with longer hours during the summer. You may need to work weekends and evenings, particularly in garden centers.
Day job or work in shifts	Day job
Social Standing of role	Medium
Impact on society	Medium
Availability of job opportunities (Current/Future)	High, Job growth is expected to be about average, at a rate of 9% for agricultural and food scientists over 2012-2022
Location	Generally towns and cities
Travel	Not much travel
People/Customer facing role	Yes. This role requires lot of interaction with customers
Skill focus- People or Cognitive skills	Both, especially people skills

Occupation	Human Science Professional
Field	Home science is the science of a home and it includes all the things that concern the person, home, family members and resources. It is the education for "better living" and the core of this education is the family ecosystem. It covers mainly three areas that is Food and Nutrition, Human Development and Family Resource Management. Home science as a field of study is application oriented and prepares one for many professions.
Required Educational Qualification or Certification	BA in Home science BSc in Home science Diploma in Home science After completing graduation in Home science one can go for courses like Masters in Home science, PhD in Home science ,PG Diploma in Homescience,Fashion Designing, Dietetics, Counselling, B Ed, Social Work, development studies, entrepreneurship, Mass Communication, Catering Technology, etc.
Role Objective/ Tasks	Home science graduates usually find employment in Teaching, Research, Institutional Management, Extension and Social Welfare, Business and Industrial Concerns, Communication and Self Employment.
Work Environment	Normal - In College/Training Center, Research institutes, Corporates
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1. Caring for other people and this should be enhanced for health care professionals 2. Safety measures, hygiene, and healthy attitude towards work 3. Highly self-disciplined skills and ability to demand the same from others in the team, department or organization 4. Communication and interaction skill is very significant as professionals in this niche usually interact with people. 5. Understanding of home management (or office) health and nutrition, social responsibilities and management of the social network existing in the society 6. Attention to Quality 7. Being Creative 8. Organizing skills 9. Expediency 10. Manual agility 11. Scientific skills 12. Ability to express one self 13. Good Self Management and Interpersonal skills
Industries that typically hire such skills	• Home Management • Household Science • Child Development • Extension Education • Foods and Nutrition • Clothing and Textiles Graduates of Home Science can work: 1. In textiles area and as Merchandiser or Designer 2. As Nutritionist and Dietitian in Hospitals and Food Sector 3. In hotel Industry in F&B or in House Keeping at tourist resorts, hotels, catering facilities, restaurants . 4. Institutional catering is a major area, which involves taking care of nutrition and diet at schools, colleges, factories, clubs, military canteens and so on. One can work with food product manufacturers or in food product development. 5. Resource management is an evolving field, which spans family finance and consumer studies, housing and space design, ergonomics in design development, interior design and decoration, entrepreneurship and institutional management. 6. In social Work and Human Development 7. As family counsellors 8. In teaching profession 9. As entrepreneurs in the field of textiles, food, baking and confectionary 10. As researcher 11. Biochemist and microbiologist in medical laboratories and industries 12. Psychologists or Counsellors in health care organizations 13. Interior designers 14. Entrepreneurs in the field of textiles, food sector, baking and confectionary
Fixed work hours?	Yes, Except it may vary in research field
Day job or work in shifts	Daily job
Social Standing of role	Medium - A Home Science professional is appreciated in the society, it also depends on which of the careers she choses
Impact on society	Medium - A Home Science professional works on making homes , lifestyle and relations better
Availability of job opportunities (Current/Future)	As there is a growing concern for health and nutrition, the changing lifestyle of present generation, Home Science course has come to limelight.
Reference link for more details	http://www.mapmytalent.in/career/home-science http://www.minglebox.com/science/courses/home-science http://www.indiacollegeshub.com/career-options/home-science.aspx
Location	More Options in Cities
Travel	Infrequent , However it may depend on the career option /industry chosen
People/Customer facing role	Majorly yes ,involves interaction with students incase of a teacher
Skill focus- People or Cognitive skills	Both. This role requires both people skills and cognitive skills as understanding people, relationships, practices , food is important in this profession

Occupation	Air Hostess
Field	Travel and Tourism
Required Educational Qualification or Certification	Either 10+2 or equivalent or a Graduation degree.
Role Objective/ Tasks	To greet every passenger, coordinate with security, make air travel comfortable of the passenger, to guide passenger during their seat settlement.
Work Environment	In flights
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1)Pleasing personality 2)Positive attitude 3)Presence of mind 4)Language proficiency 5)Good Communication skills 6)Ready to work for long hours 7) Might have to handle difficult passengers High level of patience 8)
Industries that typically hire such skills	Airlines
Fixed work hours?	No
Day job or work in shifts	Variable shifts, irregular schedules, holidays, nights and weekends.
Social Standing of role	Medium.
Impact on society	Medium. Air hostesses provide the human touch on every flight, taking care of passenger needs and keeping everyone safe
Availability of job opportunities (Current/Future)	High.
Location	Frequent travel to different locations.
Travel	Frequent.
People/Customer facing role	Yes. You get to meet different people from around the world
Skill focus- People or Cognitive skills	Both. But more emphasis on people skills.

Occupation	Air Traffic Controller
Field	Travel
Required Educational Qualification or Certification	Engineering Degree in Electronics / Tele Communication / Radio Engg. / Electrical with specialization in Electronics with 1st class (60%) OR M.Sc Degree or its equivalent with Wireless Communication, Electronics, Radio Physics or Radio Engg. as a special Subject OR <u>Equivalent with 1st Class</u>
Role Objective/ Tasks	Air traffic controllers coordinate the movement of air traffic, to ensure that aircraft stay safe distances apart.
Work Environment	Normal - At airports
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1)Communication skills-Air traffic controllers must be able to give clear, concise instructions, listen carefully to pilot's requests, and respond by speaking clearly. 2)Concentration skills- Controllers must be able to concentrate in a room where multiple conversations occur at once. 3)Decision making skills-Controllers must make quick decisions. For example, when a pilot requests a change of altitude or heading to avoid poor weather, the controller must respond quickly so that the plane can operate safely. 4)Math skills- Controllers must be able to do arithmetic accurately and quickly. 5) Organizational skills-Controllers must be able to coordinate the actions of multiple flights. Controllers need to be able to prioritize tasks, because they may be required to guide several pilots at the same time. 6)Problem-solving skills -Controllers must be able to understand complex situations, such as the impact of changing weather patterns on a plane's flight path. Controllers must be able to review important information and provide pilots with appropriate solutions.
Industries that typically hire such skills	Airport Authorities, Government/Private Airlines, Defence
Fixed work hours?	No
Day job or work in shifts	Typically, controllers work "on position" for 90 to 120 minutes followed by a 30-minute break. Usually rotating shifts, including nights, weekends and public holidays
Social Standing of role	High. The position of air traffic controller is one that requires highly specialized knowledge, skills, and abilities.
Impact on society	Medium.
Availability of job opportunities (Current/Future)	Low
Location	Airports
Travel	Infrequent.
People/Customer facing role	No.
Skill focus- People or Cognitive skills	Cognitive skills required.

Occupation	Animation
Field	Media and Entertainment
Required Educational Qualification or Certification	10+2, Skills in drawing, modelling or using computer animation packages. Animation or art-related course preferred.
Role Objective/ Tasks	Animators bring drawings or computer generated characters to life on screen
Work Environment	Normal -Inside Animation studios, post-production houses . Freelance also possible where we can work from home.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1)creativity and imagination 2)good drawing or modelling skills 3)patience and concentration 4)accuracy and attention to detail 5)good computer skills, preferably including graphics and animation software. Communication and presentation skills 6)the ability to work under pressure and meet deadlines and good teamwork skills.
Industries that typically hire such skills	Large or small animation studios, computer games developers, interactive media designers, or post-production houses for animated film and TV titles and credits. Freelance fixed-term contracts are common. -
Fixed work hours?	Depends - If employed with a firm - fixed. Not applicable for freelance work.
Day job or work in shifts	Day job.
Social Standing of role	Medium.
Impact on society	Medium.
Availability of job opportunities (Current/Future)	Medium.
Location	Mostly in Cities.
Travel	Infrequent.
People/Customer facing role	No. Will have to interact with the clients for requirements and feedback.
Skill focus- People or Cognitive skills	Cognitive skills. Artistic talent is highly valued

Occupation	Ayurvedic Physician
Field	Healthcare
Required Educational Qualification or Certification	Bachelor of Ayurvedic Medicine and Surgery (B.A.M.S.)
Role Objective/ Tasks	Medical Practitioner
Work Environment	Normal - Within a clinic or hospitals. Can also practice at home with appropriate licenses for the same.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) Provide medical care to patients 2) Use a combination of ancient and modern theories and techniques to improve the physical and mental health of patients
Industries that typically hire such skills	Hospitals, clinics, Wellness centers
Fixed work hours?	No. Might have to stretch based on emergencies.
Day job or work in shifts	Day job. Might have to stretch based on emergencies.
Social Standing of role	High.
Impact on society	High.
Availability of job opportunities (Current/Future)	Medium.
Location	Local options available.
Travel	Infrequent.
People/Customer facing role	Yes. This role requires the doctor to communicate with patients. Good people management skills and caring for others is required.
Skill focus- People or Cognitive skills	Both.

Occupation	Veterinarian
Field	Healthcare
Required Educational Qualification or Certification	You must be licensed by your state. Requirements for licensing include a DVM degree and successful completion of the comprehensive NAVE Examination.
Role Objective/ Tasks	As a small animal vet (say dog, cat ,birds) you may have to diagnose animals' health problems, vaccinate such as distemper and rabies, medicate animals suffering from infections, treat and dress wounds, perform surgery, advise owners about animal feeding, behavior and breeding etc. As a Large animals vet (say horses and cows) provide preventive care to maintain the health of food animals, test for and vaccinate against diseases, consult with farm owners and managers on animal production, feeding, and housing issues, treat and dress wounds, set fractures, and perform surgery
Work Environment	Normal - Clinic and Hospitals
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1. Knowledge of the information and techniques needed to diagnose and treat human injuries, diseases, and deformities. Biology , Customer and personal Service 2. Psychology -Knowledge of human behavior and performance 3. The most important skill is a passion for animals and a commitment to the health and well-being of animals 4. Using scientific rules and methods to solve problems. 5. Active Listening, Monitoring of other individuals, Time Management 6. Self-Control - Job requires maintaining composure, keeping emotions in check, controlling anger, and avoiding aggressive behavior, even in very difficult situations. 7. Stress Tolerance Adaptability/Flexibility
Industries that typically hire such skills	Hospitals , Clinics
Fixed work hours?	No. Depending on emergencies have to stretch.
Day job or work in shifts	shifts
Social Standing of role	High. Take care of animal health is needed just like humans.
Impact on society	The vast majority of people look upon veterinarians as people who will cure their animal when it is ill, repair traumatic injuries and advise on its general well being.
Availability of job opportunities (Current/Future)	High ,The demand of vets is on the rise in view of huge livestock population
Location	Local options available, but higher opportunities in Cities
Travel	Less
People/Customer facing role	Yes, This includes customer needs assessment, meeting quality standards for services, and evaluation of customer satisfaction
Skill focus- People or Cognitive skills	Both. This role requires both people skills and cognitive skills as understanding on the body and ability to take quick decisions and procedures appropriate for the situation when learning or teaching new things.

Occupation	Merchant Navy(Marine Engineer)
Field	Engineering
Required Educational Qualification or Certification	1.Bachelor's degree in marine engineering 2. Master of Business Administration (MBA) can lead to 3. executive and management positions in shipping, naval architecture and off-shore oil exploration <u>Doctor of Jurisprudence (J.D.), often concentrating on maritime and engineering law.</u>
Role Objective/ Tasks	Marine engineers are skilled individuals involved in the design, construction and maintenance of vehicles and structures used on or around water. Marine engineering technology and techniques are used to create cruise ships, oil platforms and harbors.
Work Environment	Harsh(sometimes if involves field work)
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1. Basic concepts of marine propulsion, fluid dynamics and ship design 2.Basic knowledge in Physics, Marine design methods Differential equations, Fluid mechanics, Control circuits, electric machinery and Ship dynamics
Industries that typically hire such skills	1.Architectural and engineering services 2.Boat building companies 3.Government agencies, Transportation companies and Scientific services
Fixed work hours?	Frequent overtime
Day job or work in shifts	Both...depending on the requirement
Social Standing of role	Medium
Impact on society	Medium
Availability of job opportunities (Current/Future)	Niche
Location	Opportunities available in local and all over the world.
Travel	Yes
People/Customer facing role	No
Skill focus- People or Cognitive skills	Cognitive Skills

Occupation	Geologist
Field	Geology (study of solid earth)
Required Educational Qualification or Certification	B.Sc./M.Sc./Ph.D. For an aspiring geologist, training typically includes significant coursework in physics, mathematics, and chemistry, in addition to classes offered through the geology department. Bachelor's degree (for private industry jobs), master's or doctorate (for more specialized positions)
Role Objective/ Tasks	A geologist is a scientist who studies the solid and liquid matter that constitutes the Earth as well as the processes and history that have shaped it. Geologists usually engage in studying geology.
Work Environment	Can be harsh if field work is involved. Depending on requirement/shift, have to stretch.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	To be a geoscientist, you should have: 1.an interest in the natural world 2.good scientific and technical skills 3.good observation skills 4.strong spoken and written communication skills 5.a methodical approach, including to solving problems 6.a good level of general fitness 7.the ability to work independently and as part of a team 8.the ability to work with statistical and graphical information 9.a willingness to travel and be away from home for long periods
Industries that typically hire such skills	Most geologists choose an area of focus, such as mineralogy, volcanology, hydrology or oceanography. Employment opportunities are available in the oil and gas, mineral, environment, government and education sectors. Engineering Firms City Planning Offices Environmental Firms Petroleum Companies Mining Companies State and National Highway Departments Publishers and producers of science books, magazines, computer software, web materials, and television shows Legal Firms
Fixed work hours?	Mostly day work/research activities is also involved, which has no fixed working hours
Day job or work in shifts	Depends upon the industry
Social Standing of role	High- depending upon the position
Impact on society	Medium. Geologists study some of society's most important problems, such as energy, water, and mineral resources; the environment; climate change; and natural hazards like landslides, volcanoes, earthquakes, and floods.
Availability of job opportunities (Current/Future)	Medium.
Location	Depends on the area of specialization and the role
Travel	frequent
People/Customer facing role	To a certain extent
Skill focus- People or Cognitive skills	Yes. Need to manage/handle bunch of people from different locations. Good Communication and admin skills are highly recommended

Occupation	Graphic Designer
Field	Graphic Design
Required Educational Qualification or Certification	A bachelor's degree in graphic design or a related field is usually required. However, those with a bachelor's degree in another field may pursue technical training in graphic design to meet most hiring qualifications.
Role Objective/ Tasks	A graphic designer is a professional within the graphic design and graphic arts industry who assembles together images, typography, or motion graphics to create a piece of design. A graphic designer creates the graphics primarily for published, printed or electronic media, such as brochures (sometimes) and advertising. Determine the message the design should portray. Create images that identify a product or convey a message. Develop graphics and visual or audio images for product illustrations, logos, and websites. Create designs either by hand or by using computer software packages.
Work Environment	Offices
What Knowledge, skills, abilities and other attributes are required to do the role competently?	To become a graphic designer, you will need: 1.creativity and imagination 2.IT skills 3.drawing skills 4.an ability to find practical solutions to problems 5.knowledge of printing techniques and photography 6.the ability to manage your time, meet deadlines and work within a budget 7.an understanding of current trends and styles 8.excellent communication skills 9.good spelling and grammar
Industries that typically hire such skills	Advertising agencies, Newspapers, Public relations firms, and manufacturers Product branding, packaging, and website design Motion picture and video industries, computer game design , and animation industry Entertainment, web development, multi-media design, and e-commerce
Fixed work hours?	No. Depending on urgency/deadlines- have to stretch.
Day job or work in shifts	Mostly day jobs
Social Standing of role	Medium.
Impact on society	Medium.
Availability of job opportunities (Current/Future)	High, emerging field.
Location	Local options available, but higher opportunities in Cities.
Travel	infrequent
People/Customer facing role	Yes. Need to communicate with clients and understand their requirements
Skill focus- People or Cognitive skills	Yes. May need to manage/handle bunch of people from different locations. Good Communication and admin skills are highly recommended.

Occupation	Oceanographer
Field	Earth Science
Required Educational Qualification or Certification	Bachelor's degree at minimum; master's or doctoral degree required for some positions
Role Objective/ Tasks	dealing with a diversity of important issues — from climate change, declining fisheries, and eroding coastlines, to the development of new drugs from marine resources and the invention of new technologies to explore the sea.
Work Environment	Adventure - working on the ocean or in areas that contact the ocean.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) Marine biologists are oceanographers that study marine ecosystems and their inhabitants. This can involve working with research animals or taking trips into the ocean to perform different experiments, collect data, or track the animals. 2) Physical oceanographers are more concerned with studying the movements of the oceans, in the waves and currents and tides that move the water itself. 3) Chemical oceanographers monitor the chemical composition of the ocean water to better understand how they shape the planet. They may study pollution or help find naturally-occurring resources on the seafloor. 4) Geological oceanographers focus on studying the ocean's floor. They may study undersea volcanic activity and its relation to the movement of tectonic plates or the deep oceanic trenches that plunge thousands of feet. General Skills: Love for the ocean, sea-worthiness (should not be seasick), a sense of adventure, physical stamina, enduring patience, ability to withstand boredom and loneliness, a curious and analytical mind, co-operative nature to work in a team, love for exploring new places and appreciative of nature and its wonders. Apart from all these knowledge of swimming and diving are essential attributes.
Industries that typically hire such skills	
Fixed work hours?	Mostly Research activities, so no fixed timings
Day job or work in shifts	Not fixed
Social Standing of role	High
Impact on society	High
Availability of job opportunities (Current/Future)	High. An oceanographer can find work all over the planet, either with large governments or academic institutions or for a corporation.
Location	Relocation required
Travel	Frequent
People/Customer facing role	No. Mainly based on analysis of ocean and other components.
Skill focus- People or Cognitive skills	cognitive skills are required. Oceanography jobs focus on the science of analyzing the oceans: their geographical and marine parameters, the motion and the composition of their waters, biological components, and the management of their resources.

Occupation	Pharmacist
Field	Health Care
Required Educational Qualification or Certification	Bachelors in Pharmacy, Masters in Pharmacy, Diploma in Pharmacy
Role Objective/ Tasks	Serves patients by delivering medications; giving pharmacological information to multidisciplinary health care team; monitoring patient drug therapies.
Work Environment	Normal - Inside a Pharmacy, Hospital, Pharmaceutical company
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1.Dispenses medications by compounding, packaging, and labeling pharmaceuticals. 2.Controls medications by monitoring drug therapies; advising interventions. 3.Completes pharmacy operational requirements by organizing and directing technicians' work flow; verifying their preparation and labeling of pharmaceuticals; verifying order entries, charges, and inspections. 4.Protects patients and technicians by adhering to infection-control protocols. 5.Maintains safe and clean working environment by complying with procedures, rules, and regulations.
Industries that typically hire such skills	Can work as Chemical/Drug Technician, Bio-Technology Industries, Drug Therapist, Drug Inspector, Hospitals, Health Inspector, Pharmacist, Pathological Lab, R&D, Making Prescription to Patients, Scientist, Research Officer
Fixed work hours?	Fixed
Day job or work in shifts	Day Job
Social Standing of role	High
Impact on society	High
Availability of job opportunities (Current/Future)	High. Can be an option for self employment also well.
Location	Local job
Travel	Infrequent
People/Customer facing role	Yes. Serves patients by delivering, making prescriptions medications which involves people interaction.
Skill focus- People or Cognitive skills	Analyzing Information , Administering Medication, Judgment, Verbal Communication, FDA Health Regulations, Pharmacology, Managing Processes, Legal Compliance, Productivity, Quality Focus, Attention to Detail

Occupation	Phlebotomist
Field	Health care
Required Educational Qualification or Certification	four-year degree in medical science or related areas, entry-level technician positions require only a one-year certification program or a two-year associate's degree.
Role Objective/ Tasks	A Phlebotomist serves patients by identifying the best method for retrieving specimens; preparing specimens for laboratory testing; performing screening procedures.
Work Environment	Normal - Inside a Laboratory, Hospital
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1.Verifies test requisitions by comparing information with nursing station log; bringing discrepancies to the attention of unit personnel. 2.Verifies patient by reading patient identification. 3.Obtains blood specimens by performing venipunctures and finger sticks. 4.Maintains specimen integrity by using aseptic technique, following department procedures; observing isolation procedures. 5.Collects therapeutic drug-monitoring assays by collaborating with nursing personnel to ensure appropriate drug dose to collection time. 6.Tracks collected specimens by initialing, dating, and noting times of collection; maintaining daily tallies of collections performed. 7.Monitors glucose levels by performing bedside glucose tests; recording results; reporting results to unit nurse-manager. 8.Performs bleeding-times tests by entering results to the computer; notifying pathologist of results falling outside normal ranges. 9.Maintains quality results by following department procedures and testing schedule; recording results in the quality-control log; identifying and reporting needed changes. 10.Resolves unusual test orders by contacting the physician, pathologist, nursing station, or reference laboratory; referring unresolved orders back to the originator for further clarification; notifying supervisor of unresolved orders.
Industries that typically hire such skills	
Fixed work hours?	Fixed with some overtime
Day job or work in shifts	Day Job
Social Standing of role	High
Impact on society	High
Availability of job opportunities (Current/Future)	High. Many hospitals and laboratories hire skilled technicians.
Location	Local job
Travel	Infrequent
People/Customer facing role	Yes.retreiving specimens; preparing specimens for laboratory testing involves customers/patients
Skill focus- People or Cognitive skills	Analyzing Information , Infection Control, Bedside Manner, Attention to Detail, Lab Environment, Procedural Skills, Quality Focus, Hospital Environment, Creating a Safe, Effective Environment, Performing Diagnostic Procedures, Informing Others

Occupation	Pilot
Field	Aviation
Required Educational Qualification or Certification	Any bachelor's degree along with Commercial pilot's license and Airline Transport Pilot (ATP) certificate
Role Objective/ Tasks	Fly and navigate airplanes, helicopters, and other aircraft
Work Environment	All over the country, but most are based near large airports.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1)Check the overall condition of the aircraft before and after every flight 2)Ensure that the aircraft is balanced and below its weight limit 3)Ensure that the fuel supply is adequate and that weather conditions are acceptable, and submit flight plans to air traffic control 4)Communicate with air traffic control over the aircraft's radio system 5)Operate and control aircraft along planned routes and during takeoffs and landings 6)Monitor engines, fuel consumption, and other aircraft systems during flight 7)Respond to changing conditions, such as weather events and emergencies (for example, an engine failure) 8)Navigate the aircraft by using cockpit instruments and visual references
Industries that typically hire such skills	Commercial airlines, Airforce/Military
Fixed work hours?	No
Day job or work in shifts	Work in shifts
Social Standing of role	High.
Impact on society	High.
Availability of job opportunities (Current/Future)	High but pilots must learn to cope with several work-related hazards.
Location	
Travel	Frequent as the job majorly involves travelling
People/Customer facing role	No
Skill focus- People or Cognitive skills	Cognitive

Occupation	Psychologist
Field	Psychology
Required Educational Qualification or Certification	Undergraduate degree in psychology (2-4 years) Graduate degree (master's or doctorate) often required by employers
Role Objective/ Tasks	Specific job duties for psychologists vary according to their specialty.
Work Environment	Normal
What Knowledge, skills, abilities and other attributes are required to do the role competently?	Depends on their field of work 1) Counseling psychologists work at schools, hospitals or individual practices. They lead group or individual counseling sessions. Their job involves talking to people and fostering positive mental health and personal growth. 2) Developmental psychologists research changes in behavioral patterns over a person's life; some focus in on particular time periods, like infancy or adolescence to be readily understood. 3)Forensic psychologists work with law-enforcement personnel and act as experts in various legal cases. 4)Research psychologists study the causes of particular behavioral patterns. They perform various lab tests on animals and humans and conduct trials with carefully controlled sample groups. 5)Industrial-organizational psychologists work with businesses to maintain a high-quality work environment. 6)Clinical psychologists work to prevent, diagnose and treat mental disorders. These psychologists typically have their own offices and perform diagnostic exams on patients. They also work alongside doctors to determine the best course of treatment for particular patients. 7)School psychologists work with parents, teachers and students to foster learning, address school-related problems and promote a safe educational environment. 8)Social psychologists examine behavioral trends in society. Their research is used to give advice on leadership, group behavior and attitude control. They also use their findings to influence custom design and advertisements.
Industries that typically hire such skills	Multiple industries
Fixed work hours?	Yes
Day job or work in shifts	Day Job
Social Standing of role	High.
Impact on society	High.
Availability of job opportunities (Current/Future)	High, as it is a multiple industries have their need for psychologist
Location	Local options available, but higher opportunities in Cities
Travel	Infrequent
People/Customer facing role	Yes. Working with people is one of the most important skill of this role.
Skill focus- People or Cognitive skills	Both.

Occupation	Travel Counselor
Field	Travel and Tourism Management
Required Educational Qualification or Certification	By attending a 2-year program in college which has program in travel and tourism + Step One: Earn a CTA (Certified Travel Assistant) + Step Two: Earn a CTC (Certified Travel Counselor)
Role Objective/ Tasks	A travel counselor is a travel agent who has earned certification through a trade organization. These professionals advise clients on interesting vacation destinations and attractions. They also handle airline, hotel and rental car bookings and explain local customs and conditions to their clients
Work Environment	travel counsellors work in the travel arrangement and reservation services industry (travel agencies and travel wholesalers). Travel counselors may work for independent agencies or they may obtain corporate employment
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) travel agents/counsellor need to have strong organizational skills and be detailed-oriented. 2) Agents must appear courteous and professional at all times 3)it's essential that anyone in this field develop excellent communication and customer service skills. 4) Business and computer skills can help travel agents with their sales and any record-keeping responsibilities 5)Good memory 6)Appreciation of tourist destinations 7)Diplomacy and social etiquettes 8)Interest in serving people 9)Interest in culture and customs
Industries that typically hire such skills	travel arrangement and reservation services industry(Government tourism departments, Travel agencies, Civil aviation, Tour operators, Self employment is a common feature in this sector, Railways, Cruise liners)
Fixed work hours?	No
Day job or work in shifts	Depend upon the type of employment
Social Standing of role	Medium.

Organizational, project management and planning skills, including the ability to juggle multiple tasks 9. An analytical mind with excellent problem-solving ability 10. Leadership skills as well as the ability to work well within a team of other professionals
Industries that typically hire such skills	1) Private architect practices 2) Large construction companies 3) Public sector bodies 4) Large industry organizations (such as large retailers)
Fixed work hours?	Yes. Depending on the project
Day job or work in shifts	Day Job mostly. Shifts may be required based on the project.
Social Standing of role	High. Architects are highly respected for giving shape to many constructions and design ideas for public and private constructions.
Impact on society	As all public infrastructure projects including from bridges, buildings, railways etc. require the expert guidance of an architect, the work of architects and their designs play a vital role in public safety and comfort.
Availability of job opportunities (Current/Future)	The demand is high, though some of these may be for short term projects. Many architects start their own individual business as the availability of many short term projects requires consultation and limited duration engagement, which is ideal for business.
Location	Local options available with local property development companies and public sector. However, more lucrative options are available in cities.
Travel	For the most part an architect's working day will be office based. However, site visits and meetings with clients are frequent, so travel can figure prominently.
People/Customer facing role	Yes. This role requires working with various strata of the society including government officials, business owners, labor leaders etc.
Skill focus- People or Cognitive skills	Both. People skills are important to interact with various people and Cognitive skills are important to develop and design good constructions.

Occupation	Anthropology
Field	Science/Humanities
Required Educational Qualification or Certification	BA/BSc or MA/MSc in Anthropology
Role Objective/ Tasks	Role of an anthropologist ranges from research to recruitment to employee/customer engagement, customer relationship and ethics management and all aspects of analyzing and interpreting human behavior.
Work Environment	Applied Anthropology, Development anthropology and even Physical anthropology find application in management and business in the Human Resources/Customer Relationship domains. Education, Literature or Language studies, Medicine, History, Psychology, Law, Designing etc.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) Learning and study skills 2) Written communication 3) Analytical and critical skills 4) Ability to gather, assess and interpret data 5) Oral communication and presentation skills 6) Discussion and group work skills 7) Statistical and computing techniques 8) Clear, logical and independent thinking 9) Organizing and planning 10) Problem-solving
Industries that typically hire such skills	1) Academics and research in Universities 2) Human Resources Department 3) Non Governmental Organizations (NGOs) 4) Museums 5) Civil Service 6) International organizations, such as the United Nations (UN) 7) Voluntary organizations 8) Advertising 9) Sales and Marketing
Fixed work hours?	Yes. Depending on emergencies have to stretch.
Day job or work in shifts	Day Job mostly
Social Standing of role	High. The role of Anthropologist is very high as it is a unique profession that is required to fit very unique requirements
Impact on society	High. Anthropology is described as the most scientific of the humanities and the most humanistic of the sciences and finds application in various aspects of social work and enhancement of human socio/economic conditions.
Availability of job opportunities (Current/Future)	The demand is medium as this is a unique profession and applicable to some industry types only. However, there is a rise in Anthropologists being hired in Human Resources team instead of MBAs.
Location	Local options available in NGOs, Universities etc. However, corporate job possibilities are higher in cities. Working for international charities and organizations may require overseas travel.
Travel	Depends on the type of industry employed with and the nature of requirement. For example, NGOs work may require travelling to rural areas while international aid roles require overseas travel. Corporate jobs may require lesser travel.
People/Customer facing role	Yes. This role requires working with people from various walks of life of all age groups/community/race as Anthropology is largely based on study of human behavior
Skill focus- People or Cognitive skills	Both. People skills are important to interact with various people and Cognitive skills are important to interpret data.

Item	Description
Occupation	Indian Army, Indian Navy, and Indian Air Force
Field	Public Servant
Required Educational Qualification or Certification	10+2 (Through NDA),
Role Objective/ Tasks	Team Player, later Team Managing, Tactical Decision making
Work Environment	Harsh, needs physical fitness
What Knowledge, skills, abilities and other attributes are required to do the role competently?	HSC, Graduation
Industries that typically hire such skills	Indian Government
Fixed work hours?	Fixed, Fixed with some overtime
Day job or work in shifts	Shifts
Social Standing of role	High
Impact on society	High
Availability of job opportunities (Current/Future)	Common
Reference link for more details	http://www.winentrance.com/career_courses/other-jobs-indian-armed-forces.html http://career.webindia123.com/career/options/defence_government/indian_army/army_officer/selectio_n.htm
Location	Relocation required, transferrable job
Travel	Desk job/Active in premises/Local travel/ Travel across cities/towns
People/Customer facing role	Yes team
Skill focus- People or Cognitive skills	People Skills, Cognitive skills

Occupation	Technical Sales
Field	Sales
Required Educational Qualification or Certification	Graduate (any stream) with good hold in speaking and writing English along with excellent marketing skills.
Role Objective/ Tasks	Develops, solicits and closes new accounts, generates sales quotations, and handles customer inquiries.
Work Environment	Software and Hardware Industry(Manufacturing).
What Knowledge, skills, abilities and other attributes are required to do the role competently?	Technical/engineering background preferred • Bachelor's degree and/or three to five years of proven sales or marketing experience • Strong interpersonal and communication skills • Knowledge of advertising and sales promotion techniques • Strong presentation skills and professional appearance
Industries that typically hire such skills	It is a multi-disciplinary stream. Technical sales engineers play a key role in many industry sectors, including: aeronautical, agricultural, automotive, biomedical, chemical, electrical, electronics, manufacturing, telecommunications.
Fixed work hours?	No. Involves shifts
Day job or work in shifts	Day Job and Shifts involved.
Social Standing of role	High.
Impact on society	High.
Availability of job opportunities (Current/Future)	Plenty
Location	Local options available, but higher opportunities in Cities
Travel	Frequent and depends on industry stream.
People/Customer facing role	Individuals will work closely with customers and their regional sales team to grow and promote the sales
Skill focus- People or Cognitive skills	People skills

Occupation	Tech Support
Field	Customer care
Required Educational Qualification or Certification	Graduate (any stream) with good hold in speaking and writing English
Role Objective/ Tasks	Monitoring and maintaining the computer systems and networks within an organization
Work Environment	Software
What Knowledge, skills, abilities and other attributes are required to do the role competently?	• An ability to assess each customer/employee's IT knowledge levels • Ability to deal with difficult callers • Logical thinker • Good analytical and problem solving skills • Up-to-date technical knowledge • An in depth understanding of the software and equipment your customers/employees are using • Good interpersonal and customer care skills • <u>Good accurate records keeping</u>
Industries that typically hire such skills	Almost all organizations as organizations increasingly rely on computer systems in all areas of their operations and decision-making processes. It's therefore crucial to ensure the correct running and maintenance the IT systems.
Fixed work hours?	No. Involves shifts
Day job or work in shifts	Day Job and Shifts involved.
Social Standing of role	High.
Impact on society	High.Organisations increasingly rely on computer systems in all areas of their operations and decision-making processes. It's therefore crucial to ensure the correct running and maintenance of the IT systems.
Availability of job opportunities (Current/Future)	Plenty
Location	Local options available, but higher opportunities in Cities
Travel	Frequent and depends on industry stream. Mostly, can be completed from workstations
People/Customer facing role	People facing
Skill focus- People or Cognitive skills	People skills

Occupation	Human resources
Field	Human resources
Required Educational Qualification or Certification	MBA in HR
Role Objective/ Tasks	Human resources specialists are responsible for recruiting, screening, interviewing and placing workers. They may also handle employee relations, payroll and benefits and training. Human resources managers plan, direct and coordinate the administrative functions of an organization.
Work Environment	Normal - Inside corporate offices
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1. business awareness and management skills; 2. organizational skills and the ability to understand detailed information; 3. IT and numeracy skills, with strong IT skills required if managing/operating computerized payroll and benefits systems; 4. interpersonal skills to form effective working relationships with people at all levels; 5. a proven track record of 'making a difference'; 6. ability to analyze, interpret and explain employment law; 7. integrity and approachability, as managers and staff must feel able to discuss sensitive and confidential issues with you; 8. curiosity and a willingness to challenge organizational culture where necessary; 9. ability to compile and interpret statistical data and communicate it in a professional and understandable manner; 10. influencing and negotiating skills to implement personnel policies; 11. potential to handle a leadership role
Industries that typically hire such skills	Almost all industries have an HR department
Fixed work hours?	Yes
Day job or work in shifts	Day Job and Shifts involved.
Social Standing of role	High.
Impact on society	High.
Availability of job opportunities (Current/Future)	Plenty
Location	Local options available, but higher opportunities in Cities
Travel	Frequent and depends on industry stream.
People/Customer facing role	Both.
Skill focus- People or Cognitive skills	Both.

Occupation	Instrumentation Engineering
Field	Production or Manufacturing Sector.
Required Educational Qualification or Certification	B.E/Btech (Hons) electronics and instrumentation
Role Objective/ Tasks	Work of an instrumentation engineer ranges from designing, developing, installing, managing equipment's that are used to monitor and control machinery. In scientific terms, instrumentation is defined as the art and science of measurement and control of process variables within a production, or manufacturing area.
Work Environment	Software and Hardware Industry(Manufacturing). Instrumentation engineers typically work for industries with automated processes, such as chemical or manufacturing plants.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) Logical Ability should be high. 2)Expected to be good in Physics. 3) Mathematical ability, computer skills, effective verbal and written communications. 4)Skilled at handling instruments and software. 5)Have leadership Qualities. 6) Adept at trouble-shooting. 7)Highly responsible role — if the instrumentation system fails, the whole plant will grind to a halt 8)Your health could be affected because of high noise and temperature levels at manufacturing plants 9)If things go wrong at work you are required to be on call 24x7
Industries that typically hire such skills	It is a multi-disciplinary stream and covers almost all Branches involved in developing instruments of streams such as chemical, mechanical, electrical, aveonics,electronics ,computers and manufacturing industries. Above all instrumentation engineer fit for both the hardware and the software industry.
Fixed work hours?	No. Depending on emergencies have to stretch.
Day job or work in shifts	Day Job and Shifts involved.
Social Standing of role	High. The role of instrumental engineer is very high has a world without instruments is practically not possible.
Impact on society	High. Nature of work of an instrumentation engineer ranges from designing, developing, installing, managing equipment's that are used to monitor and control machinery. Absence of instrumental engineer is to imagine a world without instruments which is practically impossible.
Availability of job opportunities (Current/Future)	The demand is so high that every student finds at least two jobs waiting in the wings. Due to Multi-Stream opportunities.
Location	Local options available, but higher opportunities in Cities
Travel	Frequent and depends on industry stream.
People/Customer facing role	Yes. This role requires working with co-workers of all age groups depending on your projects and stream of work, communicating with the customer to meet his demands regularly.
Skill focus- People or Cognitive skills	Both. Instrumentation engineers are presumed to be good in physics, the logical ability is expected to be on the higher side, which is a basic quality and requires Both people Skills and Cognitive Skills.

Occupation	Coach (Sports)
Field	Education/ Sports
Required Educational Qualification or Certification	(i) B.PEd In Detail: Diploma in Coaching from SAI NSNIS Patiala or from any recognized Indian / foreign University OR Participation in Olympics/Asian Games/World Championship with a Certificate Course in the concerned sports discipline from SAI NIS, OR Has successfully completed two levels of accreditation / certificate courses offered by the International Federation of the sporting discipline concerned.
Role Objective/ Tasks	To provide directions, instructions and training of the operations of a sports team or of individual sportspeople.
Work Environment	Normal - Within a Training center or a school or a college.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1. The ability to quickly develop successful working relationships with people from different backgrounds and with varying levels of sporting ability; 2. a desire to help other people succeed; 3. excellent communication and interpersonal skills; 4. team-building ability; 5. enthusiasm, flexibility and patience; 6. awareness of equality and diversity issues, including those related to sport and disability; 7. motivational skills and an understanding of the psychology that underpins successful competition (particularly at senior coaching levels); 8. organizational skills; 9. a strong interest in maintaining professional skills and knowledge
Industries that typically hire such skills	Sports Authorities ,Govt/Pvt schools, Colleges and universities , private sports clubs , fitness centers
Fixed work hours?	Yes . Depending on Events and competition have to stretch
Day job or work in shifts	Day job
Social Standing of role	Medium to High
Impact on society	Medium to high
Availability of job opportunities (Current/Future)	Low to Medium
Location	Location options Available
Travel	Infrequent
People/Customer facing role	Yes. This role requires working with players of all age groups depending on where you are coaching/teaching.
Skill focus- People or Cognitive skills	Both. This role requires both people skills and cognitive skills as good understanding of the game/subject being taught is mandatory to be a good coach

Occupation	Electrical Engineer
Field	Electrical Design , Electrical Maintenance , Electrical Power , Railway Signaling , Research , Signaling and Communications
Required Educational Qualification or Certification	Bachelor of Engineering in Electrical/Electronics, Bachelor of Science, Bachelor of Technology, or Bachelor of Applied Science depending on the university
Role Objective/ Tasks	Electrical ing has now subdivided into a wide range of subfields including repairing/creation/maintenance of electronics, digital computers, power ing, telecommunications, control systems, radio-frequency ing, signal processing, instrumentation, and microelectronics.
Work Environment	Normal - Electrical engineers work in offices, labs, and industrial plants.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	An electrical needs: - to enjoy practical and technical work - excellent problem-solving skills - to be able to undertake detailed and precise work - the ability to lead others
Industries that typically hire such skills	Railway, Electrical firms, Power plants & turbines
Fixed work hours?	No. Depending on work load have to stretch.
Day job or work in shifts	Frequent Shifts(depends in case of field work)
Social Standing of role	High. The role of an Electrical Engineer is respectfully seen due to the technicalities involved in the job
Impact on society	Medium.
Availability of job opportunities (Current/Future)	High. Electrical industry is growing very big and there are lots of opportunities both in India and abroad
Location	Local options available, but higher opportunities in Cities - based upon assignment
Travel	Infrequent
People/Customer facing role	Not really.
Skill focus- People or Cognitive skills	Both. This role requires cognitive skills as ability to take apt decisions are required

Occupation	Industrial Engineering
Field	Engineering
Required Educational Qualification or Certification	Bachelor's degree in industrial engineering or related field. A candidate who have passed his/her 10+2 or equivalent with science as a subject is eligible for admission to the Bachelor's Degree in Industrial Engineering.
Role Objective/ Tasks	Industrial engineers determine the most effective way to use the basics of any production - people, machines, materials, information, money, and energy - in order to make a product or provide a service. Industrial engineering deals with the optimization of complex processes or systems. Industrial engineers work to eliminate waste of time, money, materials, man-hours, machine time, energy and other resources that do not generate value.
Work Environment	Normal - within Corporates, Hospital, etc.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1. Communication - Effective communication skills including comprehensive reading, active listening, writing, speaking, etc. 2. Computer systems 3. Mathematics 4. Statistics 5. Design 6. Management 7. Physical and social sciences, including economics 8. Critical Thinking & Complex Problem Solving
Industries that typically hire such skills	- Hospitals and other health-care operations - Transportation, Food processing - Media - Banking - Utilities, - Local, Regional and National governments - IT - Energy
Fixed work hours?	Yes. But sometimes need to work extra hours depending on the work load.
Day job or work in shifts	Day Job
Social Standing of role	Medium.
Impact on society	Medium. Engineers have a higher standing in the society compared to many other roles
Availability of job opportunities (Current/Future)	High. The demand of Industrial Engineer is in every industry and there are lot of opportunities both in India and abroad
Location	Less Local Options but higher opportunities in Cities
Travel	Infrequent. Travel depends on the industry (s)he is working in.
People/Customer facing role	Yes.
Skill focus- People or Cognitive skills	Both. This role requires both people skills and cognitive skills as understanding the problem and ability to take critical / important decisions are required.

Occupation	Polymer Science
Field	Research & Development , Education
Required Educational Qualification or Certification	Few select jobs only require a bachelor's degree in polymer science. Ph.D. in polymer science, organic or materials chemistry
Role Objective/ Tasks	Polymer scientists use chemical polymers to build useful and unique materials such as Kevlar, Teflon, biodegradables, fiberglass, polyester and nylon among countless others. While some scientists work on designing and creating new polymer materials, many polymer scientists continue adjusting previous designs such as making Kevlar armor more lightweight and durable.
Work Environment	Research and Development Laboratories, Colleges, Universities
What Knowledge, skills, abilities and other attributes are required to do the role competently?	Analytical skills. Polymer scientists carry out scientific experiments and studies. They must be precise and accurate in their analyses, because errors could invalidate their research. Communication skills. Polymer scientists need to communicate with team members and other scientists. They must be able to read and write technical reports and give presentations. Critical-thinking skills. Polymer scientists carefully evaluate their own work and the work of others. They must determine if results and conclusions are based on sound science. Interpersonal skills. Polymer scientists typically work on interdisciplinary research teams and need to work well with others toward a common goal. Many serve as team leaders and must be able to motivate and direct other team members. Math skills. Polymer scientists regularly use complex mathematical equations and formulas, and they need a broad understanding of mathematics, including calculus, algebra, and statistics. Organizational skills. Polymer scientists need to document processes carefully in order to conform to regulations and industry procedures. Disorganization in the workplace can lead to legal problems, damage to equipment. Perseverance. Scientific research involves substantial trial and error, polymer scientists must not become discouraged in their work. Problem-solving skills. Chemists and materials scientists research and develop new and improved chemical products, processes, and materials. This work requires a great deal of trial and error on the part of chemists and materials scientists before a unique solution is found. Time-management skills. Polymer scientists usually need to meet deadlines when conducting research. They must be able to manage time and prioritize tasks efficiently while maintaining their quality of work.
Industries that typically hire such skills	Offices, Research and development laboratories
Fixed work hours?	Yes. Need to stretch based on the need
Day job or work in shifts	Day Job
Social Standing of role	High.
Impact on society	High.
Availability of job opportunities (Current/Future)	Slower than the average of other all occupations and particularly those with a Ph.D., are expected to have better opportunities.
Location	Higher opportunities in Cities
Travel	Infrequent
People/Customer facing role	Yes
Skill focus- People or Cognitive skills	Cognitive skills

Occupation	Entrepreneur
Field	Any Field
Required Educational Qualification or Certification	Graduate
Role Objective/ Tasks	Get into a venture of his own to generate revenues and employment. To take his idea of a business to the market.
Work Environment	Diverse. Has to work in offices, on the field and with the customer/client.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) Multitasker - An entrepreneur has to handle numerous responsibilities at the same time, He should be great at time management. 2) Remains calm in stressful situations as the business will have serious ups and downs 3) Interpersonal skills: Understand the customer or clients real need and effectively satisfying that need is crucial. Great listening skills really help. 4) Enthusiasm - Should be very enthusiastic about his/her work and the product or business he is pitching. 5) <u>People management and Team Leadership skills</u>
Industries that typically hire such skills	These people normally work for themselves
Fixed work hours?	No. Depending on situations these vary. Typically have long working hours..
Day job or work in shifts	Day job.
Social Standing of role	High. Entrepreneurs are valued and lauded in the society these days.
Impact on society	Medium. Successful entrepreneurs bring about a lot of change in the society.
Availability of job opportunities (Current/Future)	Self driven. As long as the business idea is strong and the if the person is committed ability to grow and flourish is high. During the initial stages it can be tough
Location	Local options available, but higher opportunities in Cities
Travel	Frequent
People/Customer facing role	Yes. This role requires high degree of communicate with clients/customers. Good people management skills is mandatory to be a entrepreneur.
Skill focus- People or Cognitive skills	Both. This role requires both people skills and cognitive skills as understanding on the customers psyche is important and ability to drive the team to achieve desired result is essential.

Occupation	Museologist
Field	Research
Required Educational Qualification or Certification	BA in Art, Art History. BA in Museum and Curatorial Studies MA in Art, Art History, Museum and Curatorial Studies
Role Objective/ Tasks	To manage the collections of artefacts or works of art. To deal with the acquisition, care and display of items with the aim of informing and educating the Public
Work Environment	Normal - Within the museum
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) Selecting, buying or borrowing items 2) Organizing records catalogues and indexes 3)Arranging conservation and restoration 4)Setting up displays and exhibitions 5)Helping visitors to interpret and enjoy exhibits and collections 6)Managing budgets 7)Organizing publicity and fundraising 8)Liaising with staff in other museums 9)Giving talks to groups 10)Supervising staff
Industries that typically hire such skills	National, Government and Private Museums hire curators/museologists
Fixed work hours?	No. Depending on emergencies have to stretch.
Day job or work in shifts	Day Shift
Social Standing of role	Medium. The role of a Museologist is helping the current generation understand historical studies/life style
Impact on society	Medium. Professionals in the museology field have a good standing in the society compared to many other roles
Availability of job opportunities (Current/Future)	Good enough. Fewer number of people opt for studying the Museology. Hence there is good scope for the professional museologists
Location	Higher opportunities in Cities
Travel	Professionals in the field of museology may have to travel a little frequently in order to study about the historical pieces. But once the museum is stable/settled there is no need of frequent travel.
People/Customer facing role	Yes. This role requires communicating with the people in order to guide them when visited the Museum.
Skill focus- People or Cognitive skills	Both. This role requires people skills and cognitive skills as solving the visitors clarifications and being creative in improvising the museum are important for museologists.

Occupation	Copywriter
Field	Advertising/Marketing/Retail
Required Educational Qualification or Certification	Bachelor's degree-English, journalism, communication
Role Objective/ Tasks	•Deliver words and verbal content that accompanies the visual elements of an organization or product. •Copywriters are responsible for generating the words, slogans and audio scripts that accompany advertising visuals •Meeting with account executives to discuss the client's requirements and core messages and target audience. •Familiarizing themselves with the product, target audience and competitor activities in the market. •Brainstorming ideas and concepts for the visual and words with other members of the creative team. •Presenting initial ideas to the creative director, some of which may be rejected or developed into workable concepts. •Writing various copy options, which may be presented to the client as a story board (a consecutive series of frames depicting the script and drawings that may be used). •Reviewing progress, modifying copy until the client is satisfied. •Overseeing the production phase, booking and liaising with designers, illustrators, printers, photographers and production companies. •Casting actors and models to appear in adverts.
Work Environment	Travel: mostly office based but can involve travel within the working day with the art director to visit clients, film and recording studios. Working hours: mainly Monday to Friday office hours but work can extend into evenings and weekends to meet particular deadlines. Location: mainly in cities. Opportunities for self-employment: Self-employment and freelance work possible for those with experience and contacts.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	
Industries that typically hire such skills	•Larger advertising and full service marketing agencies •Newspapers •TV and radio stations •Digital and new media companies that write copy for websites.
Fixed work hours?	Based on Requirements
Day job or work in shifts	Based on Requirements
Social Standing of role	In Earlier Generations Copywriters weren't well known as advertising and endorsements weren't in boom, but in today's world, Copywriters do stand at a good place in the society.
Impact on society	They play a major role in society today as anywhere and everywhere we see advertisements and campaigns and Copywriters are the brain behind them
Availability of job opportunities (Current/Future)	Currently Copywriters are in demand. Employment of advertising, promotions and marketing managers is expected to grow 7% between 2012 and 2022, according to the BLS. In addition, there might be more job competition due to the allure of this particular industry
Location	Not Specific
Travel	Based on Requirements
People/Customer facing role	Yes, Organizations, Marketing managers, Advertising Agencies
Skill focus- People or Cognitive skills	• A keen eye for detail and the highest level of curiosity • Computer-like research skills • Outstanding learning skills and empathy • Selling skills

Occupation	Company Secretary
Field	Administration & Management
Required Educational Qualification or Certification	Course after 10+2 pass or equivalent OR Graduation. Should complete Company Secretaries course
Role Objective/ Tasks	Company secretaries in all sectors have high level responsibilities including governance structures and mechanisms, corporate conduct within an organization's regulatory environment, board, shareholder and trustee meetings, compliance with legal, regulatory and listing requirements, the training and induction of non-executives and trustees, contact with regulatory and external bodies, reports and circulars to shareholders/trustees, management of employee benefits such as pensions and employee share schemes, insurance administration and organization, the negotiation of contracts, risk management, property administration and organization and the interpretation of financial accounts. Company secretaries are the primary source of advice on the conduct of business and this can span everything from legal advice on conflicts of interest, through accounting advice on financial reports <u>to the development of strategy and corporate planning</u>
Work Environment	Public & Private Sector Companies
KSAOs	Has an interest in or knowledge of company law and/or governance Is able to influence colleagues at the highest levels Has strong attention to detail Can write clearly and concisely Can take in and process large amounts of information Is trustworthy, keeping confidential information confidential
Industries that typically hire such skills	Corporate Companies, Private & Public sector companies.
Fixed work hours?	The work is mainly office based. Company secretaries generally work normal office hours, although it may be necessary to work longer hours to accommodate lengthy meetings and to complete reports, such as the company Annual Report, for regulatory deadlines.
Day job or work in shifts	Day Job
Social Standing of role	Low. Company secretaries are responsible for ensuring that an organization complies with standard financial and legal practice and maintains high standards of corporate governance. They won't have much social interaction.
Impact on society	Medium.
Availability of job opportunities (Current/Future)	High.
Location	Local options available, but higher opportunities in Cities
Travel	Infrequent
People/Customer facing role	Yes. This role requires to communicate with higher authorities of the company.
Skill focus- People or Cognitive skills	Cognitive Skills

Occupation	Mechanical Engineering
Field	Engineering(Technical)
Required Educational Qualification or Certification	B.E/B.Tech, D.M.E(Diploma),At least 50% marks and 60% for being eligible for IITs in 10+2 with PCM as subjects. Entrance Exams: IIT JEE, AIEEE, Around 46 short courses as various certificates/ short courses provided in India and other foreign countries. Ex: Certificate competency in Mech Engg. Strong academic background in Physics and Maths , with other sciences as chemistry is preferred.
Role Objective/ Tasks	Looks into design, production and usage and operation of machines. Mother branch of engineering.
Work Environment	Govt and private industries
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) Deal with concepts such as mechanis, thermodynamics, robotics, kinematics, structural analysis, fluid mechanics and many others. These concepts are applied in the process of designing state of the art manufacturing units, different types of motor vehicles, aircraft and aerospace parts and a vast assortment of industrial machinery. 2) Contribution is also in the development of various engines, powered plant equipment, heating and cooling systems and other simple and complex machinery. 3) Also responsible for testing, manufacturing and maintaining them. Nowadays mech engrs are involved in nano technology, development of composite materials, biomedical a[plications, environmental conservation, etc. Provides a wide bouquet of job options to students who are looking for a stable and stimulating career.
Industries that typically hire such skills	Govt and private industries, automobiles, space research, aeronautical, energy and utilities, air conditioning, bio-mechanical industries. Major employers include giant manufacturing plants, air conditioning pants and refrigeration plants, turbine manufacturing plants, oil and gas exploration and refining industries, and agricultural sector.
Fixed work hours?	Not always
Day job or work in shifts	Mostly Day job. But if working for a major plant shifts would be applicable.
Social Standing of role	Medium
Impact on society	Medium
Availability of job opportunities (Current/Future)	High.
Location	Local options available, but higher opportunities in Cities
Travel	Infrequent
People/Customer facing role	Not always
Skill focus- People or Cognitive skills	Cognitive Skills. People skills is good to have to be a good team player.

Item	Possible Answers
Occupation	Farmer
Field	Public Servant/Agriculture B.Sc.(Ag.) holders are given some benefits like- B.Sc.(Ag.) holders receive higher stipend than BSc holders in DBT supported post graduate courses in Biotechnology. The Gazetted post like Agricultural Officer(Agronomist) the Basic educational requirement is BSc Agriculture
Required Educational Qualification or Certification	Studies in agriculture include soil science, genetics, cropping and pasture systems, soil-plant interaction, livestock production, agricultural economics and agribusiness. B.Sc. in agriculture (Honors) is one of those courses which are widely explored in this present era. The Bachelor of Science in Agriculture, usually abbreviated as either B.Sc.(Agr.) or B.S.A. or B.Sc.(Ag.) or B.Sc. (Hons.) Ag. is the first undergraduate degree awarded by university faculty of agriculture and agricultural colleges. The program is 4 years of study above Grade 12 High School graduation. The B.Sc.(Agr.) degree is normally not a general degree but requires specialization: for example, majoring in animal science, plant protection, soil science or agricultural engineering. The minimum qualification for entry to B.Sc.(Ag.) is Intermediate (12 years of school education) in Science (with Physics, Chemistry, Biology and/or Mathematics) or Intermediate in Agriculture stream (limited states). India has one of the world's largest agricultural education system with 42 State Agricultural Universities (SAUs),[3] 1 Central Agricultural University (CAU), 5 Deemed Universities (DUs) and 4 general Central Universities with Agriculture faculty.
Role Objective/ Tasks	Mango, banana, potato, soybean and poultry are the five main farm products which could form the bedrock of rejuvenation in India's agriculture and allied activities landscape in the next two decades. This can be created by building a strong brand for these products in the international markets, reducing wastage by almost half and doubling the per hectare yields, according to the third Food and Agriculture Integrated Development Action Report titled: 'India as an agriculture and high value food powerhouse: A new vision for 2030, prepared jointly by CII and McKinsey and Company. The five products have been selected based on their crop size and relevance for consumers, growers and crop diversity. Today, India ranks second worldwide in farm output. Agriculture and allied sectors like forestry and fisheries accounted for 13.7% of the GDP (gross domestic product) in 2013,[2] about 50% of the workforce
Work Environment	
What Knowledge, skills, abilities and other attributes are required to do the role competently?	Users can download various agriculture licenses and certificates forms provided by the Agriculture Department of Tamil Nadu & other states. Forms for dealer certificate, renewal of the certificate, registration of insecticides, license to manufacture insecticides, renewal of certificates to sell insecticides, etc. are available. https://india.gov.in/topics/agriculture/agricultural-licence
Industries that typically hire such skills	
Fixed work hours?	Fixed with some overtime, Frequent overtime
Day job or work in shifts	Day Job, Shifts
Social Standing of role	Medium
Impact on society	High
Availability of job opportunities (Current/Future)	Common
Reference link for more details	https://india.gov.in/topics/agriculture/agricultural-licence https://en.wikipedia.org/wiki/Bachelor_of_Science_in_Agriculture
Location	Relocation required, Local options available
Travel	Active in premises/Local travel/ Travel across cities/towns
People/Customer facing role	Yes
Skill focus- People or Cognitive skills	People Skills, Cognitive skills

Yes

Item	Possible Answers
Occupation	Farmer
Field	Public Servant/Forestry
Required Educational Qualification or Certification	Forestry is one of the most sought after career options available for candidates who have the zeal to study about wildlife and natural resources. The educational qualification required for undergraduate course (BSc Forestry) is generally 10+2 Science with Physics, Chemistry, Biology and/or Mathematics. Further the master's level course offers specialisation in subjects like Forest Management, Commercial Forestry, Forest Economics, Wood Science & Technology, Wildlife Science, Veterinary Science etc. Those candidates who have completed master program in Forestry or allied subject can go for PhD and research. The Indira Gandhi National Open University and few other open universities of the country are offering diploma and certificate programs in forest management and conservation of natural resources. A fresh graduate in forestry can expect a monthly salary of Rs.10, 000 or more in hand only in any private NGO or related organization. However, as per the government pay scale the foresters, at present, receive salary scale of Rs. 4,575 i.e. Rs. 8,000 per month. One who is in the research field or working as Enthologists, Entomologists, Silviculturists, Forest Range Officers, Zoo curators etc get relatively higher salary ranging from Rs.15,000 – Rs.20,000 per month. Read more at: www.AndhraColleges.com Read more at: www.AndhraColleges.com
Role Objective/ Tasks	As of 2010, the Food and Agriculture Organisation of the United Nations estimates India's forest cover to be about 68 million hectares, or 24% of the country's area Forestry in India is more than just about wood and fuel. India has a thriving non-wood forest products industry, which produces latex, gums, resins, essential oils, flavours, fragrances and aroma chemicals, incense sticks, handicrafts, thatching materials and medicinal plants
Work Environment	Harsh
What Knowledge, skills, abilities and other attributes are required to do the role competently?	
Industries that typically hire such skills	Another upcoming segment is that of wildlife consultants for premier organizations like World Wildlife Fund (WWF) India, Centre for Environment Education, located in Ahmedabad, Tata Energy Research Institute (TERI). Consultancy firms like Ernst and Young, KPMG hire wildlife consultants to do environment impact assessments prior to their projects. A good number of NGO hire Indian biologists and veterinarians to undertake projects in South Africa, Kampuchea, and Vietnam among others. The widest sector of employment is provided by the Indian Forest Service, with a national cadre and a forest department in each state and union territory running more than one environment assessment project at any given time. Last but not the least the individual can opt for teaching-a relatively sedate and secured profession! Those with Bachelors degree in related subjects can appear for Indian Forest Service exam conducted by Union Public Service Commission and after qualifying the exam can get jobs under the department of forests, Govt. of India. The various positions available for forestry and wildlife graduates are: Forester, Dendrologists, Enthologists, Entomologists, Silviculturists, Forest Range Officers, Zoo curators and many more. At the international forum opportunities exist in television channels like Discovery and Natural Geographic, which conduct in-depth research in wildlife, flora, ecology and evolution of species etal. Location	Relocation required, Local options available
Travel	Active in premises/Local travel/ Travel across cities/towns
People/Customer facing role	Yes
Skill focus- People or Cognitive skills	People Skills, Cognitive skills

Item	Possible Answers
Occupation	Software Engineer
Field	IT (Information Technology)
Required Educational Qualification or Certification	BE, M Tech, MCA, BCA
Role Objective/ Tasks	Create and maintain a software product or application for companies that help improve work productivity or provide entertainment
Work Environment	Normal - Inside offices with air conditioning
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1. Knowledge of computer systems, programming languages, design patterns and other programming tool knowledge is required to be able to develop software 2. Analytical skills to understand business problems and requirements to come up with a solution approach 3. Communication skills to effectively work in a team in person or remotely using collaborative tools such as email, telephone, video conference etc. 4. An attitude to Drive for Perfection in delivery is required to make the delivery defect free which means more time is testing and fine tuning the product
Industries that typically hire such skills	Private software product or service companies. Banks, PSUs, Insurance and other generic companies for system administration and support
Fixed work hours?	Fixed for maintenance and support roles. Frequent overtime for new development projects
Day job or work in shifts	Mostly Day Job, Shifts required during product implementation
Social Standing of role	Medium, in big cities society understands what software engineers do. However many in the society do not understand what software engineers do
Impact on society	Medium, software engineers have indirect impact in improving lives of people through technology however they do not directly serve people
Availability of job opportunities (Current/Future)	Niche
Reference link for more details	https://en.wikipedia.org/wiki/Software_engineer
Location	Jobs are mainly clustered around Metros and big cities
Travel	Travel across the world is possible to serve customers, although majority will be working in front of a computer in their own office location
People/Customer facing role	Yes. This is a people centric job as Service companies need to work with customer for each project while product companies have internal customers to interact and satisfy
Skill focus- People or Cognitive skills	Both, This job requires good communication to work in a people centric team and also good technical knowledge to implement solutions.

Item	Possible Answers
Occupation	Automobile Engineering
Field	Diploma Trainees/Asst Engineer/Asst Trainee/ Research Engineer Trainee
Required Educational Qualification or Certification	BCA, BE/B.Tech(Auto, CSE, ECE, IT, Mechanical Engineering, Electronics & Instrumentation)
Role Objective/ Tasks	Design and implement software of embedded devices and systems from requirements to production and commercial deployment •Design, develop, code, test and debug system software •Review code and design •Analyze and enhance efficiency, stability, and scalability of system resources •Integrate and validate new product designs •Support software QA and optimize I/O performance. •Provide post production support. •Interface with hardware design and development. •Assess third party and open source software. •Proficient in Embedded Linux or other embedded operating systems. •Porting algorithms or applications to new embedded platforms •Optimizing existing algorithms or applications •It will also be having to travel to different institutes/schools in pan India to provide training on existing technologies to the trainees and the students.
Work Environment	NA
What Knowledge, skills, abilities and other attributes are required to do the role competently?	
Industries that typically hire such skills	Manufacturing companies, Government Service
Fixed work hours?	Fixed, Fixed with some overtime, Frequent overtime
Day job or work in shifts	Day Job in maximum opportunities
Social Standing of role	Medium
Impact on society	Medium
Availability of job opportunities (Current/Future)	Niche - as per the specialization the person will have to select the opportunity

Location	Local options available - BEML eg.
Travel	Desk job/Active in premises
People/Customer facing role	No
Skill focus- People or Cognitive skills	Cognitive skills

Occupation	Bio Engineering
Field	HealthCare, Research, medical devices, diagnostics, genetics, pharmaceutical manufacture, drug discovery, environmental remediation, or agricultural advancement
Required Educational Qualification or Certification	Two common pathways to a bioengineering career: Path1: Major in biomedical engineering (BME)-> Some foundational engineering coursework (not as much as a traditional engineer) with more biology related courses -> Stronger in synthesizing information for creation and marketing of new products Path2: Major in traditional engineering disciplines (electrical engineering, mechanical engineering, chemical engineering, etc.) ® Strong traditional engineering coursework with some additional biology-related courses ® Stronger in designing devices and understanding how they work A master's or doctoral degree offers the biomedical engineer greater opportunities in research and development, whether such work resides in an industrial, academic, or government setting. A bachelor's degree in biomedical have opportunities as an entry level engineering position in a medical device or pharmaceutical company, a clinical engineering position in a hospital, or even a sales position for a biomaterials or biotechnology company A fraction of biomedical engineers even choose to enter law school, planning to work with patent law and intellectual property related to biomedical inventions
Role Objective/ Tasks	Bioengineering often applies traditional engineering expertise to human applications in medicine. One of its primary functions is to develop better solutions for the prevention, diagnosis, and treatment of disease; patient rehabilitation; and to improve health. Many bioengineering professionals seek to help people by solving complex problems in medicine and healthcare. Some bioengineering jobs combine several disciplines, requiring a diverse array of skills. Digital hearing aids, implantable defibrillators, artificial heart valves, and pacemakers are all bioengineering products that help people combat disease and disability. Bioengineers develop advanced therapeutic and surgical devices, such as a laser system for eye surgery and a device that regulates automated delivery of insulin. Bioengineering techniques have led to major scientific breakthroughs, such as: - Ultrasound, MRI and other medical imaging techniques - Computer-assisted tomography - Magnetic resonance imaging - Artificial hips, knees and other joints - engineered organisms for chemical and pharmaceutical manufacturing - Pacemakers, dialysis machines, and diagnostic equipment - Other medical imaging systems
Work Environment	It can vary depending upon the job. Analytical skills. Biomedical engineers must be able to analyze the needs of patients and customers to design appropriate solutions. Communication skills. Because biomedical engineers sometimes work with patients and frequently work on teams, they must be able to express themselves clearly. They must seek others' ideas and incorporate those ideas into the problem-solving process. Creativity. Biomedical engineers must be creative to come up with innovative and integrative advances in healthcare equipment and devices. Math skills. Biomedical engineers use the principles of calculus and other advanced topics in mathematics, as well as statistics, for analysis, design, and troubleshooting in their work. Problem-solving skills. Biomedical engineers typically deal with and solve problems in complex biological systems. Most bioengineering specialists work in medical equipment and supply manufacturing, scientific research and development services and pharmaceutical and medicine manufacturing. Many others work for hospitals, government agencies, or as independent contractors or consultants. An aging population, focused on health and quality of life issues, has increased the demand for better medical devices and equipment. Coupled with this long-term trend is an industrial concern for cost efficiency and effectiveness. This requires the talent of biomedical engineers.
Industries that typically hire such skills	Most bioengineering specialists work in medical equipment and supply manufacturing, scientific research and development services and pharmaceutical and medicine manufacturing. Many others work for hospitals, government agencies, or as independent contractors or consultants.
Fixed work hours?	Depends
Day job or work in shifts	Most of the time day jobs.
Social Standing of role	High. An aging population, focused on health and quality of life issues, has increased the demand for better medical devices and equipment. Coupled with this long-term trend is an industrial concern for cost efficiency and effectiveness. This requires the talent of biomedical engineers.
Impact on society	High. Biomedical Solutions impact the society and you are able to improve a lifespan of an individual which is the most valuable thing one has got
Availability of job opportunities (Current/Future)	In India, most of the jobs related to Biomedical Engineering are in non-tech areas such as service, maintenance, customer support, sales and management. Students interested in pursuing a career in research and core development work in Biomedical Engineering must look for jobs in universities, labs and research centers in India or pursue MS and PhD studies in USA, UK and other nations.
Location	Higher opportunities available outside of India.
Travel	NA
People/Customer facing role	Depends on the Job.
Skill focus- People or Cognitive skills	Both. This requires both the skills.

Yes

Item	Answers
Occupation	Civil engineering
Field	Engineering
Required Educational Qualification or Certification	Diploma in Civil Engineering(DCE), Bachelor of Engineering(B.E) / Bachelor of Technology(B.Tech) / Bachelor of Science(B.sc) - Civil Engineering, Master of Engineering(M.E) / Master of Technology(M.Tech) / Master of Science(M.sc) - Civil Engineering, Master of Science(M.S) - Civil Engineering(From US, UK, South east Asia, Australia and other countries) <u>Ph.D - Civil Engineering</u>
Role Objective/ Tasks	Civil engineering is a professional engineering discipline that deals with the design, construction, and maintenance of the physical and naturally built environment, including works like roads, bridges, canals, dams, and buildings, etc.
Work Environment	Civil engineers generally work in a variety of locations and conditions. Many spend time outdoors at construction sites so that they can monitor operations or solve problems onsite. The job is typically a blend of in-office and on-location work. Modern civil engineering work is done in offices, working with plans or computers
What Knowledge, skills, abilities and other attributes are required to do the role competently?	*Strong background in mathematics and physical sciences(Physics, Chemistry, Geology, Astronomy, Ecology). *For in-office civil engineering jobs following courses are recommended: •Microsoft Office (Especially Microsoft Excel) •AutoCAD Civil 3D •Autodesk •StaddPro •Civil Designer •HEC-RAS •MicroStation •Microsoft Project •Primavera (Popular project management software) •RFEM •SoftreeOptimal •Visioncivil •AutoTURN *For on-location civil engineering jobs following courses are recommended:
Industries that typically hire such skills	Civil engineering takes place in the public sector from municipal through to national governments, and in the private sector from individual homeowners through to international companies.
Fixed work hours?	In-office civil engineers - Fixed with some overtime, On-location civil engineers - Frequent overtime
Day job or work in shifts	In-office civil engineers - Mostly day Job On-location civil engineers - Sometimes shifts
Social Standing of role	High
Impact on society	High
Availability of job opportunities (Current/Future)	Niche
Reference link for more details	Wikipedia - https://en.wikipedia.org/wiki/Civil_engineering Jagran Josh - http://www.jagranjosh.com/careers/civil-engineering-1286361314-1
Location	Location depends upon the project taken up. Transfers depends upon the size of the organization.
Travel	In-office - Desk job/Local travel On-location-Local travel/ Travel across cities/towns
People/Customer facing role	In-Office - Should be team player. Should be able to meet customers. On-location - Should be able to talk to lots of people working in the site.
Skill focus- People or Cognitive skills	People Skills and Cognitive skills both required.

Occupation	Accountant
Field	Accounting
Required Educational Qualifications or Certification	B.com, M.Com, MBA
Role Objective/ Tasks	To manage the capital and report on financial information about the performance, financial position, and cash flows of a business. Key responsibilities are managing income statement, creating a Balance Sheet, Statement of Cash inflows/outflows and retained earnings.
Work Environment	Normal, usually office/accounting office
What knowledge, skills, abilities and other attributes are required to do the role competently?	1. Accountants should be able to maintain Journal, Ledger entries as per the accounting principles and prepare reconciliation statement. 2. Accountants must be able to present the reports on timely manner, so need time management skill 3. Accountant should have a decent communication skill to present their reports in business language 4. Perform accounting and clerical functions to support supervisors/manager/department head 5. Should be able to do the basic financial analysis with any given set of numbers and prepare MIS (management information system) report every month 6. Should be a team player who keep constant touch with different department to have thorough information on accounts
Industries that typically hire such skills	All Govt/Pvt/MNC companies, Schools, Colleges, Accounting firms, institutions, hospitals.
Fixed work hours?	Yes
Rate job or work in shifts	Not job
Social Standing of role	Medium. Accountants/Finance Analysts are respected within the company because, their reports play important role to take business decisions.
Impact on society	Medium. Accountants/Finance professionals are considered as most educated and have ability to manage their funds and help companies too. Most of the time, people consult them to take their decisions on investment and borrowing.
Availability of job opportunities (Current/Future)	High. Managing the company capital is the Art of running a business, so Accounting/Finance is required for all sort of business and service firms. Irrespective of industries, accounts are required in all fields to manage the funds and to take financial decisions.
Location	Local offices available but higher opportunities in cities.
Travel	Not required
People/Customer facing role	As an accountant, you will not reach out to customer. You will only discuss within the departments and your higher ups and your team
Skill focus- People or Cognitive skills	Both. This role requires both people skills and cognitive skills as accountant need to reach out to different departments to get information and understanding of the account principles are mandatory.

Yes

Occupation	Technical Writing
Field	Technical/Corporate
Required Educational Qualification or Certification	1) Most technical writers enter the field with degrees or backgrounds in English, science or engineering, computer science, and/or journalism. 2) A technical background will give an easier transition and show potential employers your comfort with technical topics.
Role Objective/ Tasks	A technical writer is a professional writer who produces technical documentation that helps people understand and use a product or service. E.g. When you buy a mobile phone it comes with a User Manual or a User Guide. Technical Writers write this document.
Work Environment	With in a Office/Corporate Environment
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) If you have a knack for explaining complicated projects and procedures in simple, easy-to-follow steps, you have the skills necessary to be a technical writer. 2) Web design - At its core, technical writing is about clearly and efficiently communicating information. Since visual media are so effective at communicating certain types of information, an understanding of design principles will make you a more effective technical writer. 3) Programming - Understanding how users interact with computers and technology is key to conveying information. Programming and software development knowledge will allow you to demonstrate the kind of technical expertise that will make you an effective technical writer. 4) Good Communication skills 5) Flair for writing (Simple but good English) 6) An inclination to learn new technologies 7) Working knowledge of computers
Industries that typically hire such skills	A technical writer can find work in various firms such as advertising agencies, IT companies, Newspapers and magazines etc.
Fixed work hours?	No, Depends on the requirement
Day job or work in shifts	Mostly it is a Day Job, In few cases Technical writers may be expected to work evenings and weekends to coordinate with those in other time zones or to meet deadlines. Most work full time
Social Standing of role	Medium
Impact on society	Medium
Availability of job opportunities (Current/Future)	High - one can also branch out of technical writing and into a number of related fields like 1) Business analyst 2) Usability specialist 3) Information architect 4) Project manager 85% of Technical writing jobs are with major IT companies.
Location	High opportunities in cities
Travel	infrequent
People/Customer facing role	Yes. Need to work with internal teams to obtain an in-depth understanding of the product and the documentation requirements.
Skill focus- People or Cognitive skills	Yes. Both People and cognitive skills are required as understanding the of the product with the help of product designers/developers is required to create a good documentation.

Item	Possible Answers
Occupation	call center agent
Field	Customer care
Required Educational Qualification or Certification	Graduate (any stream) with good hold in speaking and writing English along with excellent marketing skills.
Role Objective/ Tasks	The main role of a call center agent is to attend calls, satisfy the customers with accurate answers and to sell the products by calling different customers. However, the job responsibilities of a call center agent vary as per the organization.
Work Environment	Normal - Corporates
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) Verbal Communication, Phone Skills, Listening, Data Entry Skills, People Skills, Informing, Customer Focus, Customer Service, Attention to Detail, Professionalism, Multi-tasking 2) A very good command over English language is the main skill required. 3) Computer literacy, typing speed, knowledge of consumer behavior, marketing skills (a certificate or Diploma in Marketing in case of 'outbound' telemarketing is preferable), the ability to enter and retrieve information quickly from databases and an ability to analyze problems are other useful skills that come in handy. 4) Good communication and listening skills are important.
Industries that typically hire such skills	Corporates with customer care/ helpdesk process
Fixed work hours?	Usually fixed with some overtime but in shifts
Day job or work in shifts	Frequent Shifts
Social Standing of role	Medium
Impact on society	High
Availability of job opportunities (Current/Future)	Though a common job, there is a scope of growth as one moves onto become a manager.
Reference link for more details	
Location	Local options may be available depending upon the place of residence. Else, there is a need of relocation.
Travel	Desk job
People/Customer facing role	Yes
Skill focus- People or Cognitive skills	Both. People Skills and Cognitive skills are needed to be patient with the customer and understand his problem as quickly as possible

Occupation	Financial Analyst
Field	Government or Private Corporate
Required Educational Qualification or Certification	Bachelor's degree in accounting, finance, statistics, economics, business administration or another related field. A master's degree is often required for more advanced positions.
Role Objective/ Tasks	Become responsible for financial planning, analysis and projection for companies and corporations.
Work Environment	Normal - Inside corporate offices
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) Business Analysts must be able to Analyze current and past financial data and performance 2) Business Analysts must be able to Prepare reports and projections based on this analysis 3) Business Analysts must be able to forecast future revenues and expenditures to establish cost structures and determine capital budgeting for projects. 4) Business Analysts must be able to Establish and evaluate the profit plans 5) Business Analysts must be able to Coordinate with other members of the finance team to review financial information and forecasts 6) Senior-level financial analysts work with CFOs and other executive-level team members to set company-wide investment direction and policies. 7) Business Analysts must be able to Improve financial status by analyzing results, monitoring variances, identifying trends, recommending actions to management.
Industries that typically hire such skills	Govt/Pvt Corporate Companies, Training/Coaching institutes
Fixed work hours?	Yes
Day job or work in shifts	Day Job, May require to work on weekends also.
Social Standing of role	High. Financial Analyst are highly respected in the corporate sector companies
Impact on society	High. The role of the Financial Analyst in growth of a corporate company is very high
Availability of job opportunities (Current/Future)	High. Corporate section is a very fast growing sector and there are many opportunities in both Private and Public Corporate Companies
Location	Local options available, but higher opportunities in Cities
Travel	Frequent, May need to visit clients locations
People/Customer facing role	Yes. This role requires Financial Analyst to communicate with clients. Good people management skills
Skill focus- People or Cognitive skills	Both. This role requires both people skills and cognitive skills as good understanding of the Business strategies is mandatory to be a good Financial Analyst

Item	Description
Occupation	Advertising
Field	Corporate Role
Required Educational Qualification or Certification	BA(Advertising)
Role Objective/ Tasks	Advertising is at the front of delivering the proper message to customers and prospective customers. The purpose of advertising is to convince customers that a company's services or products are the best, enhance the image of the company, point out and create a need for products or services, demonstrate new uses for established products, announce new products and programs, reinforce the salespeople's individual messages, draw customers to the business, and to hold existing customers
Work Environment	Corporate work environment with emphasis on creativity and deadlines. The person must be able to redirect stress towards a goal-oriented approach.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	Bachelor's degree in Advertising, Creativity, Writing Skills, Management skills
Industries that typically hire such skills	Account Management, Account Planning, Creative, Media, Interactive Marketing
Fixed work hours?	Variable working hours: All too often, inspired advertising is not produced in a traditional working week. Be prepared for long nights, weekends and a whole lot of rejection. The creative work is the heart and soul of any ad agency. It's the product. Which means it has to be great work. Say goodbye to regular 9-5 hrs.
Day job or work in shifts	Day Job, Shifts
Social Standing of role	It commands respect and it is also fun. High
Impact on society	This job has a direct impact on the consumers. Medium
Availability of job opportunities (Current/Future)	Common
Reference link for more details	https://www.quora.com/What-is-it-like-to-work-at-an-advertising-agency http://advertising.about.com/od/careersource/a/What-To-Expect-In-An-Advertising-Career.htm http://www.advertisingjobsnow.com/degrees-needed-for-advertising-jobs.html
Location	Completely depends on the agencies.
Travel	Desk job that sometimes requires Travel across towns/cities/countries
People/Customer facing role	The role requires the person to work in a team setting by interacting with the clients. "It's also subjective, so a great idea to one person is a complete head-scratcher to another. That means that, unlike an accountant, there are no right or wrong answers. You are at the whim of the creative director, who is at the whim of the client."
Skill focus- People or Cognitive skills	People and cognitive skills

Item	Possible Answers
Occupation	Scientist/Specialist/Representative/Professionals
Field	Life sciences/Agricultural and horticultural sciences, and urban and land studies
Required Educational Qualification or Certification	B.Sc. /M.Sc. /Ph.D
Role Objective/ Tasks	Agricultural scientist is an individual who performs studies and sets up experiments relating to the environment. The agricultural scientist will prepare laboratory setups and analyze pertinent data to reach a wide variety of results on numerous environmentally based projects.
Work Environment	Agricultural scientists work in various industries, including colleges and universities, manufacturing, and in scientific research and development
What Knowledge, skills, abilities and other attributes are required to do the role competently?	Agricultural scientist needs: -good communication skills -ability to analyze and solve problems -ability to make accurate and detailed observations -patience -interest in agriculture and the environment <u>-understanding of business principles</u>
Industries that typically hire such skills	Industries/colleges and universities/manufacturing/ scientific research and development
Fixed work hours?	Fixed
Day job or work in shifts	Day Job
Social Standing of role	High
Impact on society	High
Availability of job opportunities (Current/Future)	Niche
Reference link for more details	https://collegegrad.com/careers/agricultural-and-food-scientists
Location	Agricultural and food scientists typically work full time and have standard schedules. Some positions may require these workers to travel for a moderate portion of their work time
Travel	Field work includes visits to farms or processing plants
People/Customer facing role	No. They spend most of their time studying data and reports in a laboratory or office.
Skill focus- People or Cognitive skills	Cognitive skills

Occupation	Food Technologist
Field	Healthcare
Required Educational Qualification or Certification	Bachelor's degree in Nutrition
Role Objective / Tasks	Food research and development, quality control, market research, food safety
Work Environment	Normal Laboratories, research departments, or quality inspection and control on production lines
What knowledge, skills, abilities and other attributes are required to do the role competently?	1. Food technologist should be able to analyze both raw ingredients and finished goods 2. Be able to experiment with new additives, substitutes and production processes to promote healthier food products. 3. Ensure that no harmful agents are introduced to the ingredients being used in case a new product is developed. 4. Work on appearance and taste of the food products
Industries that typically hire such skills	Laboratories, research departments, or quality inspection and control on production lines.
Fixed work hours?	Generally fixed but in some roles shift work is common to meet production runs.
Can you work in shifts	Generally yes/no
Social Standing of role	Medium: As their job is required for meeting the increased food needs and public awareness about healthy eating habits.
Impact on society	Medium: As the job involves researching and developing foods that are safer and healthier for consumption.
Availability of job opportunities (Current/Future)	High due to the need for increased food quantity and quality for an expanding population, as well as more public awareness about healthy eating habits.
Reference link for more details	1. http://naem.org/articles/What_Is_a_Food_Technologist.html 2. http://www.ill.org/knowledge-center/learn-about-food-science/day-in-the-life.aspx 3. https://nationalcancersevice.direct.gov.uk/advice/planning/joboffers/Pages/foodscientist.aspx
Location	Food technologist jobs
Salary	Local regions available, but higher opportunities in Cities
People/Customer facing role	No
Skill focus: People or Cognitive skills	Both: This role requires both people skills and cognitive skills as it requires analyzing and experimenting with various food products as well as working with engineers, production personnel and marketing experts to resolve any product development or problems.

Item	Possible Answers
Occupation	Archaeology
Field	Public Servant
Required Educational Qualification or Certification	Required Master Degree. Ph.D , B. Ed, BA Anthropology w/conc in Geospatial Technologies
Role Objective/ Tasks	Anthropologists and archeologists study the origin, development, and behavior of humans. They examine the cultures, languages, archeological remains, and physical characteristics of people in various parts of the world.
Work Environment	Most work in an office, some analyze samples in laboratories or do fieldwork. Fieldwork in remote areas usually requires travel for extended periods.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	Develop data collection methods and systems tailored to a particular specialty or project Collect information from observations, interviews, and documents Record and manage records of observations taken in the field via GPS/GIS and other proprietary software Analyze data, laboratory samples, and other sources of information to uncover patterns about human life, culture, and origins Prepare reports and present research findings Communicate with team leads, managers, and IT staff through regular, scheduled field status reports and presentation of research findings Engage in field survey, testing, monitoring, and data recovery Advise organizations on the cultural impact of policies, programs, and products Professional report and site form preparation, research, and literature reviews
Industries that typically hire such skills	Research organizations, government, and consulting firms.
Fixed work hours?	Frequent overtime
Day job or work in shifts	Day Job
Social Standing of role	High
Impact on society	High
Availability of job opportunities (Current/Future)	Niche
Reference link for more details	http://www.environmentalscience.org/career/archaeologist
Location	Relocation required. Field work.
Travel	Travel across cities/towns
People/Customer facing role	Person to work in a team and deal with people.
Skill focus- People or Cognitive skills	Cognitive skills

Occupation	Lab Technician (Medical)
Field	Healthcare
Required Educational Qualification or Certification	Certification and licensure required by some states after graduation.
Role Objective/ Tasks	Provides information for patient diagnosis and treatment by performing laboratory tests in toxicology, chemistry, hematology, immunology, and microbiology laboratories; receiving, typing, testing, and recording blood bank inventories.
Work Environment	Normal - hospitals, diagnostic laboratories and physicians' offices. Also, blood and organ banks, medical equipment sales companies, research facilities, clinics, public health organizations, as well as pharmaceutical and reference laboratories. Their workplaces are clean, sanitized and well lit. They must wear protective clothing, including lab coats, masks, goggles and gloves, when handling equipment or specimens. They can work odd shifts throughout the day and be on call, in case of emergency.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) Memory- able to recall signs, symptoms, diagnoses from previous clients 2) Collects sample in a safe, competent, ethical and timely manner. Should collect the correct samples. 3) Interpersonal skills: Supports a client during a painful procedure, identifies others' needs, maintains professional boundaries. 4) Potential exposure to infectious diseases, chemicals and allergens; tolerate disposing of body waste (urine, feces, vomit); and tolerate unpleasant and foul odors
Industries that typically hire such skills	Hospitals, clinics, Laboratories, etc. Some also working with government positions such as the FDA, USDA, non-medical industrial laboratories, and manufacturing.
Fixed work hours?	Yes. But it again depends on emergencies have to stretch.
Day job or work in shifts	Both Day & Night (Rotating or Frequent)
Social Standing of role	Medium. The role of a Technician in helping people to detect the particular root cause and level of the disease is deeply appreciated
Impact on society	Medium. Health care professionals have a higher standing in the society compared to many other roles
Availability of job opportunities (Current/Future)	High. Health care industry is growing very big and there are lots of opportunities both in India and abroad
Location	Local options available, but higher opportunities in Cities
Travel	Infrequent
People/Customer facing role	Yes. This role requires Technicians to communicate with patients. Good people management skills and ability to tell them truth in a positive way is mandatory to be a good Technician
Skill focus- People or Cognitive skills	Both. This role requires both people skills and cognitive skills as understanding on the human body and test samples and ability to take quick decisions are required

Occupation	Dairy Scientist
Field	Animal Sciences
Required Educational Qualification or Certification	A Masters degree in agricultural science or a relevant field of study (Coursework should include topics in bovine health and breeding, agricultural systems and animal production 3)
Field Objective / Tasks	Enhance the quality of dairy products
Work Environment	Normal - Within a job or company set up
What knowledge, skills, abilities and other attributes are required to do the role competently?	1) Key skills: Critical thinking, observation, decision-making, analytical, problem-solving and communication skills as well as Reasoning abilities 2) Tools knowledge: Ability to navigate industry-specific software, such as USDA National Nutrient Database for Standard Reference, ability to use industry-specific tools, such as crushing and filling machinery 3) Voluntary certification helps to enhance career options and an
Industries that typically hire such skills	Farms, dairy product manufacturing companies, ranches, dairy product research labs
Field work hours?	Yes
On-site job or work site shifts	Shift job
Social transfer of role	Medium
Impact on society	Medium, Dairy Scientists offer a promising option for value addition and resource mobilization in terms of availability of Food for the consumers and simultaneously providing more earnings at the same time.
Availability of job opportunities (Current/future)	High, There is large scope for Dairy and Food industry to grow in view of the globalization and increasing purchasing power of consumers. This will further increase the requirement of Dairy Scientists.
Location	Local options available, but higher opportunities in Cities
Travel	Work job/field job is across the local travel
People/Customer facing role	Yes, This role sometimes require interaction with the customers, farm visitors and so on.
Skill focus: People or Creative skills	Cognitive skills as they must learn everything from raising cattle to insurance, a dairy owner

Yes

Item	Description
Occupation	Astronomy
Field	Research
Required Educational Qualification or Certification	M.Sc. Physics/Maths, Ph.D. / An engineer with a B.Tech or B.E. degree, with an aptitude for Astronomy and Astrophysics, can also enter the field as a research scholar.
Role Objective/ Tasks	Astronomy is the science which deals with the study of heavenly bodies. It considers (a) their motions, both real and apparent, and the laws which govern those motions; (b) their forms, dimensions, masses, and surface features; (c) their nature, constitution, and physical condition; (d) the effects which they produce upon one another by their attractions and radiations; (e) their probable past history and future development.
Work Environment	Research institutes and government organizations/University as a Faculty/Industry
What Knowledge, skills, abilities and other attributes are required to do the role competently?	Make sure your communication skills are excellent. You will be expected to write numerous scholarly articles during your academic career. You might also need to write grant proposals and proposals for observing time to the different observatories. And remember that, as with most scientific disciplines nowadays, astronomy requires involvement in international collaborations, so good English communication skills are essential. Remember that many astronomers also work as university lecturers and professors, so teaching skills and knowing how to interact with students is important. Especially early on, be prepared for the possibility of spending long night-time hours in observatories and travelling a lot for conferences, meetings and observation runs. If you're motivated enough, all the preparation will seem worthwhile as you start to uncover the secrets of the Universe in your career as an astronomer.
Industries that typically hire such skills	Astronomers must hold the following skills: Ability to solve complex problems, conduct research and accurately analyze data Strong math and science skills Ability to work within a team Knowledge of specific science-related software programs
Fixed work hours?	Research scholars : Work long and irregular hours, including weekends, evenings and nights, depending on the project you are part of and the observations Faculty : Fixed hours Industry : Fixed hours
Day job or work in shifts	Research scholars : No Shift. Based on Work need to extend Faculty : Fixed Shift Industry : No Fixed Shifts
Social Standing of role	High. Researchers and Lecturers are highly respected in the society
Impact on society	High. The role of researcher is innovating new things for the society and the role of the Lecturer in shaping the future of our society is very high
Availability of job opportunities (Current/Future)	After getting a PhD, astronomers usually spend three to six years in one or more postdoctoral positions in universities or research institutions. Afterwards, astronomers look for steady positions as researchers or group leaders either in a university department, national facility, or government research center. Eventually astronomers are granted university tenure, a permanent position where they generally work for the rest of their career. Astronomy is a small field, but very popular. Only those with a strong education, ability and a deep passion for the subject are likely to find a permanent position. However, training as an astronomer can open doors in many related fields including other research areas, industrial research, commercial or industrial enterprises, education, public relations and outreach.

Location	Across countries depending on the research institute.
Travel	Frequent travel to meetings and conferences, and to visit observatories
People/Customer facing role	No
Skill focus- People or Cognitive skills	Cognitive skills is important

Occupation	Beautician
Field	Personal care services
Required Educational Qualification or Certification	Typically required to complete a certificate or degree program in cosmetology, aesthetics or another specialty or a beautician's course
Role Objective/ Tasks	Beauticians may cut, color and style hair to enhance a client's appearance. Some beauticians, such as aestheticians, provide skin care, nail care and hair removal treatments. Beauticians may specialize in certain areas, such as makeup application, nail art, color analysis or personal styling services. Individuals who work in hair salons may spend a long day on their feet, with continuous exposure to cosmetic chemicals such as hair color, permanent solution and others. Those who work in day spas and resorts may experience a more comfortable work environment. A Beautician usually performs many of the following tasks: • Giving clients manicure and pedicures • Conducting facials and massages • Doing electro therapy treatments • Making and cancelling appointments • Working in the reception area • Listening to and advising clients
Work Environment	Normal - Within a Saloon/Spa/Resort , Freelance for specific events/occasions such as marriage
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) He or she helps not only with the application of treatments but also with advising and recommending appropriate services via client consultations. Many in this position will specialize in a specific area, such as makeup or nails, whilst those focusing on hair often go by the title of hairdresser 2) This position requires robust communication skills, creative flair, excellent eye-hand coordination and the ability to work efficiently and calmly under pressure 3) Being able to communicate and listen well • Being able to stand for long periods of time • Being commercially aware and detail oriented • Being diplomatic and convincing • Being discreet and honest • Being respectful and friendly • Creativity and inventiveness • Hygiene and grooming • Making clients feel comfortable • Manicures, pedicures, massages and facials • Understanding of human anatomy • Understanding product information 4) Proper training is essential; many individuals begin via apprenticeship positions and certification is available through
Industries that typically hire such skills	Hospitality - Saloon/Spa/Resort , Freelance for Marriages & other occasions, Movie Industry, Leisure
Fixed work hours?	Yes
Day job or work in shifts	Day Job
Social Standing of role	Low
Impact on society	Low
Availability of job opportunities (Current/Future)	High
Location	Local options available, but higher opportunities in Cities
Travel	Infrequent
People/Customer facing role	Yes. This role requires to communicate with customers. Good people management skills is mandatory for a beautician
Skill focus- People or Cognitive skills	Both. This role requires both people skills and also a bit of artistic skills/Creative flair

Item	Description
Occupation	Bio Informatics
Field	Information Technology and Molecular biology, Research
Required Educational Qualification or Certification	For B.Tech in Bio Informatics, 10 + 2 with maths,physics,chemistry and biology
Role Objective/ Tasks	Manage, process, and analyze genomic and molecular data. Build and maintain databases to contain the information, and create or select algorithms to process, analyze, visualize, and interpret those data.
Work Environment	Research laboratories
What Knowledge, skills, abilities and other attributes are required to do the role competently?	Basic essential knowledge in the specific domains of computer science, statistics and mathematics that intersect with modern biology. communicating and representing biological knowledge and processes in mathematical, statistical and computing terms and concepts. Critical thinking and problem solving skills in quantitative aspects of biology. <u>A strong knowledge in chemistry</u>
Industries that typically hire such skills	Research laboratories that performs researches in pharmaceuticals, medical technology, biotechnology, computational biology, proteomics, computer information science, and biology. Sequencing companies GWAS companies Pharma/computation Research wing of IT firms Genomics 'software' companies <u>medical equipment and supplies manufacturing</u>
Fixed work hours?	No
Day job or work in shifts	Since its more of a research job, there is no specific timing
Social Standing of role	High. Bioinformaticians being researchers brings more respect in the society.
Impact on society	Medium. They do not have a direct impact on the society. But their researches might help in bringing drastic changes in Healthcare sector.
Availability of job opportunities (Current/Future)	Currently, the opportunities are less in India. Western countries have wide opportunities in this field. But the field is highly promising in near future for our country too.
Reference link for more details	http://www.environmentalscience.org/career/bioinformatics-specialist http://www.careerindia.com/courses/unique-courses/what-is-bioinformatics-scope-career-opportunities-012034.html http://www.winentrance.com/career_courses/career-prospects-bioinformatics.html
Location	Since its an emerging field of study, opportunities in India are comparatively low. So relocating to other cities in India or other countries might be required
Travel	Infrequent
People/Customer facing role	No. Most of the work falls behind the desk.
Skill focus- People or Cognitive skills	Cognitive skills

NOTE

This job needs a lot of patience and strong skills in data analytics, molecular biology, statistics, Mathematics, sequencing techniques, instrumentation

Description	Fashion Designer
Field	Fashion Design
Required Educational Qualification or Certification	B.A. Fashion Designing,B.Sc. Fashion Designing, Diploma in Fashion Design, Advanced Diploma in Fashion Designing.
Task Objectives/ Tasks	Fashion designers sketch and design clothing items and collections. Designers may work independently or for boutiques, manufacturers and other fashion entities.
Work Environment	The working conditions of a fashion designer are as varied as the type of design work available. Because designers can be employed by major corporations, manufacturers, design firms or themselves, it is impossible to set down a "typical" working condition.
What knowledge, skills, abilities and other attributes are required to do the job?	1)A good eye for colour, texture and shape 2)An understanding of the characteristics of fabrics and how they can be used. 3)Drawing skills & ability to use computer design packages.
Associated with typical job functions?	1)Detailed sketches,sketches,sketches and sketches..... 2)Drawing skills,sketches,sketches and sketches.....
Hard work hours?	Designers work however long it takes to meet production deadlines. There are no set work hours if you are self employed. Fashion designers typically work long hours during launches and fashion-show seasons. Designers must adapt their hours to suit their clients' needs.
Can job or work is stable?	Depends on the assignment.
Social standing of job	Medium - high status job, job design.
Impact on society	Medium. Fashion Designers are Trend setters and have a higher standing in the society compared to many other roles, indirectly they are responsible for creating new trends in the fashion industry.
Availability of job opportunities ()	High. Fashion Design is growing very big and there are lots of opportunities both in India and abroad.
Gender/Ethnicity	Gender opportunities in India, China, India, America, Europe, Middle East, etc.
Gender	Both.
People/Customer facing role	Yes.
Self-focus, People or Community skills	Both. This role requires both people skills and cognitive skills as understanding on the human body and ability to take quick decisions to create design.

Occupation	Bodyguard
Field	Security
Required Educational Qualification or Certification	Must: Training in defense, weaponry and combat are required Must be born: College Degree Driving skills Know Dr. Williams or personal coacher. Weapon assessment and first aid
Job Objective/ Tasks	A personal security officer who protects clients from and through all means, intelligence and dealing.
Work Environment: What knowledge, skills, abilities and other attributes are required to do the role competently?	1) Preparation and presence of mind 2) Excellent vision and hearing 3) Strong physical shape 4) Active thinking, critical analysis and communication skills 5) Experience in the field of combat and defense
Industries that typically hire such skills	Important understandings/positions/positions in any company
Find work hours?	Depends: Hours are typically set for guards working at a security company, while personal armed bodyguards are sometimes required to be on call 24 hours a day, every day
How job or work in shifts	Can be day/night/in shifts
Social Stimulation of role	Medium
Availability of job opportunities (Current/Future)	High: Where safety of the person/company they are associated with
Location	Global
Stress	Depends on who or what they are protecting
People/Customer facing role	Yes- both with the client as well as the outside environment
Task focus: People or Computer skill	Both- requires both people skills and the attention

Occupation	Career Counselor	
Field	Education and Public Community	
Required Educational Qualifications or Certification	any Undergraduate or Graduate from any field	Certificate Programs in Career Counseling
Role Objective/ Tasks	A career counselor is an individual trained to aid people with their career choice. Whether the person is new to the working world, or simply desires a change of profession, the career counselor will be able to guide them in the best possible direction.	
Work Environment	<u>General: Jobs and Occupations or Occupations Database</u> 1) provide consulting, coaching, and counseling so that clients can explore their interests and options more in-depth. 2) The counselor takes things like personality, aptitude, interests, personality, and behavior into consideration as they help guide clients towards careers that will make them happy. 3) After they have assessed a client they will then match them up with a field suitable for their skills and personality, creating the most profitable match possible in terms of job satisfaction and monetary earnings. 4) There is no agreed definition of career counseling worldwide, mainly due to conceptual, cultural and linguistic differences. 5) These professionals are trained in various counseling techniques, are usually certified and licensed in the state they practice, and work in schools, clinics, community centers, residential facilities, and private practices, helping individuals, couples, and families overcome difficulties and cope with setbacks.	
Industries that typically hire	Govt/Private schools, colleges, NGOs, Training/Coaching Institutes	
Learn with		
Find work here?	No, doesn't use customer relations	
See job or work in skills	No, can't be done or it's not recommended using customer relations	
Good knowledge of job	Medium, because you need to be capable of talking to clients and will have to advise	
Interest in customer	Medium, could be rather difficult as sometimes people do not understand or completely ignore what you have to say and just walk away in fits	
Availability of job opportunities	Medium, This sector is growing but unless developed countries we do not have many career counselors here	
Careers (Future)	Good	
Salary	Depends on skill set...	
People/Customer facing job	Yes, This job is all about convincing and serving the customers by providing advice and accurate options to the clients that suits them.	
Deal from: People or Customer skills	Yes, This role requires both people skills and cognitive skills without which you cannot earn your bread. Must have good communication skills and convincing power.	

Occupation	Cinematographer
Field	Media
Required Educational Qualification or Certification	Bachelor's degree is required, certificate and associate degree programs.
Role Objective/ Tasks	Highly creative and dedicated Cinematographer with an excellent record of film production service. Expert at handling a high volume of simultaneous tasks with ease and accuracy. Able to maintain cordial and professional relationships with actors , directors and producers.
Work Environment	Any location based on the film requirements.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1. Have good technical knowledge of photo-chemical and digital processes 2. Know all about camera equipment 3. Have in-depth knowledge of lighting techniques and how to achieve them 4. Have considerable industry experience 5. Be flexible in order to adapt ideas instantly 6. Be able to take decisions quickly 7. Know about photography, painting and the moving image 8. Have artistic vision 9. Be creative 10. Pay precise attention to detail 11. Have good colour vision 12. Be able to give and accept direction 13. Have excellent communication skills 14. Be diplomatic and tactful when working with cast and crew
Industries that typically hire such skills	They may own a studio or can work for other movie makers.
Fixed work hours?	No. Depending on the completion of the films have to stretch.
Day job or work in shifts	Day and night work.
Social Standing of role	High. The role of a cinematographer is appreciated by the people.
Impact on society	Medium. Media professionals have a higher standing in the society compared to many other roles
Availability of job opportunities (Current/Future)	Medium and low. Opportunities to become a cinematographer is medium and competition to withstand as a best cinematographer is high.
Location	Local opportunities are available. But higher opportunities in cities.
Travel	Infrequent
People/Customer facing role	Yes. This role requires cinematographer to communicate with more people. Socialism is mandatory to make the film reach to people in a good way.
Skill focus- People or Cognitive skills	Both. This role requires both people skills and cognitive skills as understanding on the situation to make a complete film and ability to manage thousands of people with various aspects.

Occupation	Civil Servant (IAS - Indian Administrative Service, IPS - Indian Police Service ,IFS - Indian Foreign Service)
Field	Public Servant
Required Educational Qualification or Certification	UPSC Exam Pattern : The examination has three stages - Civil Services Aptitude test (CSAT), a main exam and finally an interview Eligibility to Apply : Graduates from a recognized university and should be between 21-30 years of age. For SC/ST candidates there is an age relaxation of 5 years. Repeated attempts are allowed up to four times for General Merit candidates, seven times for OBC candidates. There is no bar on the number of attempts for SC/ST candidates Note: Those with professional or technical qualifications recognized by the government are also eligible. Those who have given the final year examination of their degree program and are awaiting results are also eligible. Application Details: http://www.civilserviceindia.com/civil-services-list.html

Day job or work in shifts	Day Shift .Responsible to handle emergency and critical situations
Social Standing of role	High. Role of Civil Servant is respected by the people.
Impact on society	High. Civil Servants have high responsibilities to handle in society than other roles.
Availability of job opportunities (Current/Future)	Medium. Opportunity to become a Civil Servant is Medium since need to clear competitive examinations.
Location	Opportunities are available in rural and urban areas.
Travel	Infrequent
People/Customer facing role	Yes. This role requires civil servant face public and interact with people and solve issues frequently.
Skill focus- People or Cognitive skills	Both. This role requires both people and cognitive skills. Need to face people to solve issues and take steps wisely and quickly.

Occupation	Coast Guard
Field	Defense
Required Educational Qualification or Certification	Selection Process: Mental Ability Test/ Cognitive Aptitude Test and Picture Perception & Discussion Test (PP&DT). Eligibility to Apply: High school, diploma or equivalent (minimum) , Bachelor degree is required for Officer entry. Note: For Sailor entry bachelor degree is not required. Application Details: http://www.joinindiancoastguard.gov.in/
Role Objective/ Tasks	Responsible for search and rescue, enforcement of maritime law - smuggling, immigration and shipping regulations and protecting the country's maritime and offshore resources
Work Environment	Sailors need to travel across the Sea. Officers might need to travel less frequently compared to Sailors.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1.Safety and protection of artificial islands, offshore terminals and other installations. 2.Protection and assistance to fishermen and mariners at sea. 3.Preservation and protection of marine ecology and environment including pollution control. 4.Assistance to the Department of Customs and other authorities in anti-smuggling operations. 5.Law enforcement in territorial as well as international waters. 6.Scientific data collection and support National defense during hostilities (under the operational control of the Indian Navy). 7.Physical fitness is must. 8.Undergo eight weeks for exclusive training for coastal guards.
Industries that typically hire such skills	Indian Coastal Guards are hired by ministry of defense for officer and Sailor posts,etc.
Fixed work hours?	No. Depending on needs to meet natural hazards, wars,etc, need to stretch.
Day job or work in shifts	Both Day shift and night shifts.
Social Standing of role	High. Role of Coastal Guard is respected by the people.
Impact on society	High. Coastal Guards have higher responsibility to protect and secure the society, they have higher standing in the society.
Availability of job opportunities (Current/Future)	Medium and low. Opportunities to become Coastal Guard is medium, nominal vacancies are there in defense and need to be physically fit.
Location	Opportunities are available in rural, urban and coastal areas.
Travel	Frequent
People/Customer facing role	Yes. They face people to save their lives during natural calamities, protect people during war time,etc.
Skill focus- People or Cognitive skills	Both. This role requires both people and cognitive skills. Need to face people to protect and save them and react quickly and ability to handle the situation.

Occupation	Dietitian / Nutritionist
Field	Healthcare
Required Educational Qualification or Certification	B.Sc. Home Science / B.Sc Nutrition / Four Years Food Technology Course. <i>A candidate who have passed his/her 10+2 with Physics, Chemistry and Biology (PCB) as main subjects is eligible for admission to the above courses.</i>
Role Objective/ Tasks	Role of Dietician / Nutritionist includes: 1. Planning food and nutrition programmes 2. Supervising meal preparations in schools and hospitals 3. Recommending dietary modifications 4. Educating patients on diets that may help their condition 5. Working with other healthcare professionals to provide a multidisciplinary healthcare approach 6. Informing on the severity of illness and complications of treatments, inclusive of the benefits and burdens of feeding in all conceivable routes. 7. Active in the patients care as the dietitian reporting on the nutritional status of the patient, as well as, the advisor to the physician and medicinal team 8. Informing the legal decisions that may help determine the route of care for the patient, such as more aggressive or palliative care. 9. Develop meal plans, taking both cost and clients' preferences into account
Work Environment	Normal - within school, hospital, sports and health club, etc.
What Knowledge, skills, abilities and other attributes are required to do the role competently?	A good dietitian or nutritionist should have following skills - 1. Analytical skills - Dietitians and nutritionists must keep up to date with the latest food and nutrition research. They should be able to interpret scientific studies and translate nutrition science into practical eating advice. 2. Compassion - Dietitians and nutritionists must be caring and empathetic when helping clients address health and dietary issues and any related emotions. 3. Listening skills - Dietitians and nutritionists must listen carefully to understand clients' goals and concerns. They may work with other healthcare workers as part of a team to improve the health of a patient, and they need to listen to team members when constructing eating plans. 4. Organizational skills - Because there are many aspects to the work of dietitians and nutritionists, they should be able to stay organized. Management dietitians, for example, must consider the nutritional needs of their clients, the costs of meals, and access to food. 5. Problem-solving skills - Dietitians and nutritionists must evaluate the health status of patients and determine the most appropriate food choices for a client to improve his or her overall health or manage a disease. 6. Speaking skills - Dietitians and nutritionists must explain complicated topics in a way that people with less technical knowledge can understand. They must be able to clearly explain eating plans to clients and to other healthcare professionals involved in a patient's care.
Industries that typically hire such skills	Outpatient care centers, Hospitals, Nursing and residential care facilities, Government, Accommodation and food services, Sports and Health Club
Fixed work hours?	Mostly yes. But it varies depending on the industry.
Day job or work in shifts	Both Day Job and Work in Shifts involved. People can opt in for part time as well.
Social Standing of role	High. Due to changes in food habits of most of the urban population, role of nutritionists and dieticians is becoming more important.
Impact on society	High. It plays a major role in promotion of health and well being of individual.
Availability of job opportunities (Current/Future)	High. The demand is increasing nowadays.
Location	Cities
Travel	Based on requirement but not frequent.
People/Customer facing role	Yes. This role requires to communicate with all age groups. Good people management skills and caring for others is mandatory to be a good nurse
Skill focus- People or Cognitive skills	Both. This role requires both people skills and cognitive skills as understanding on the human body and ability to understand their need.

Occupation	Environmentalist
Field	An interdisciplinary academic field that integrates physical, biological and information sciences to the study of the environment, and the solution of environmental problems
Required Educational Qualification or Certification	B.Sc or a B.E degree in Environmental Science. <i>The minimum qualification required for this is 12th standard with Science subjects.</i> For better job opportunities, Masters in Environmental Science should be pursued.
Role Objective/ Tasks	Environmental scientists conduct research to identify, control, or eliminate sources of pollutants or hazards affecting the environment or public health. Their research generally involves determining data collection methods; collecting and analyzing air, water, and soil samples; analyzing environmental data gathered by others; and analyzing for correlations to human activity. They also need to prepare reports and presentations that explain their findings. Environmental scientists also develop plans to prevent, control, or fix environmental problems like air pollution. They may also advise government officials that make policy, and businesses that need to follow regulations or improve their practices. Some conduct environmental inspections of businesses. Many assess the potential effects of development projects to prevent creating new problems. Some environmental scientists and specialists focus on environmental issues, while others focus on issues relating to human health. Either way, they work on critical issues solving some of the most important problems of our day
Work Environment	Harsh - Worked in Applied fields and interdisciplinary settings
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1. Very good computer skills. 2. Good written and oral communication skills and strong interpersonal skills 3. Critical thinking abilities and great analyzing abilities <i>An environmental scientist begins his or her work in field exploration or sometimes in the laboratory as a technician or research assistant.</i>
Industries that typically hire such skills	National Level Departments/ Organizations: -> Industries , distilleries, fertilizer plants, mines, refineries, textile mills etc. -> Social Development -> Research and Development -> Forest and Wildlife Management -> NGOs -> Pollution Control Boards -> Urban Planning -> Water Resources and Agriculture -> Public Institutions and Private Industries and Firms -> Colleges and Universities -> Ministry of Environment and Forests International Organizations: These organizations are involved in environmental management, and conservation efforts: -> Inter-governmental Panel on Climate Change (IPCC) -> United Nations Environment Programme (UNEP) -> Earth System Governance Project -> Embassies and other inter-national organization related to environment
Fixed work hours?	Yes. But may have to stretch depending on the requirement
Day job or work in shifts	Day Job involved
Social Standing of role	High. The rapid growth in urbanization and industrialization, has badly disturbed and destroyed the balance of our environment, as a result of which there has been unsustainable growth and development. There is a huge responsibility on the part of the environmentalist or environmental scientists to propose several environment friendly processes of development.
Impact on society	High. It plays a major role in providing a better environment to the society.
Availability of job opportunities (Current/Future)	High.
Location	Cities
Travel	Based on requirement but not frequent.
People/Customer facing role	Yes. This role requires person to work in a team as well.
Skill focus- People or Cognitive skills	Both. This role requires both people skills and cognitive skills as they need to communicate scientific and technical information to the public, organizations or internal audiences through oral briefings, written documents, workshops, conferences, training sessions or public hearings.

Occupation	Forensic Scientist
Field	The field of forensic science draws from a number of scientific branches, including physics, chemistry, and biology, with its focus being on the recognition, identification, and evaluation of physical evidence
Required Educational Qualification or Certification	Below is the list of Forensic Science courses with their minimum eligibility criteria - 1. PG Diploma Course Certification: Graduation in any discipline from recognized School, College, Institute or University. (Final year appeared students can also apply) 2. Advanced Diploma Course Certification: 10th (SSC) or 10+2 (HSC) or Diploma passed in any discipline from recognized Board/ School/ College. (Final year appeared students can also apply) 3. Short Terms Certificate Course Certification: 10th (SSC) or 10+2 (HSC) or Diploma passed in any discipline from recognized Board/ School/ College OR Basic knowledge about related field. 4. Certification (Expert / Gold): 10+2 (HSC) / Diploma or Pursuing Graduation in any discipline. Basic / Introductory knowledge about related field. Professional Specialized Certification: Graduation (10+2+3 or 10+2+4 Or 10+2+5) any related discipline or Diploma / Post Graduation passed in any discipline from recognized Board/ School/ College, Institute / University. Basic knowledge about related field / studied related subject / Working Experience in related area etc.... Basic knowledge about related field. (Final year students can also apply) 5. Certification (Universal): Graduation with min. 1 year experience in related area or Post-Graduation / Doctorate in any discipline from recognized School, College, Institute or University. Basic knowledge and Experience about related field. (Final year students can also apply)
Role Objective/ Tasks	There are different name for different roles of a Forensic Scientist - 1. Forensic Pathologists: Forensic pathologists determine the time and cause of death in cases of suspected murder or suicide. 2. Forensic Anthropologists: Those who have a PhD in Anthropology or medical degree with forensic science can work as forensic anthropologists who help in identification of individuals murdered or killed in disasters i.e. plane crashes, explosions, fires, etc. and give testimony to the age, sex, ancestry, stature and unique features of the deceased persons. 3. Forensic Psychologists: Professionals with a degree in psychology can work as forensic psychologists wherein they assist a court or other fact finders in arriving at a just or correct decision. 4. Clinical Forensic Medicine Experts: Such professionals possess medical degree and post graduate degree or diploma and work as the examiner of victims of crime and suspects who may have sustained injuries while allegedly committing a crime and reach to specific conclusions pertinent to the crime and timing. 5. Forensic Serology Experts: These professionals work as analyst and analyze blood groups, blood, and other bodily fluids and do DNA fingerprinting to arrive at a conclusion. 6. Forensic Chemists: Those who have science degree and specialization in applied or forensic chemistry can work as forensic chemists wherein they help in the detection and identification of illicit drugs, accelerants used in arson cases, explosive and gunshot residues, trace evidence, including paint, glass, polymers and fibers, etc. 7. Dactyloscopists: The most commonly known work of Dactyloscopists is to study fingerprints received from the scene of crime and link them with suspects. 8. Forensic linguists: These professionals analyze the content of written or oral communication and identify criminals particularly in cases of kidnapping where they help in zeroing in on the criminal. 9. Toxicologist: Professionals with qualification in chemistry or biochemistry work in to help police in the detection and identification of pharmaceutical
Work Environment	Harsh - Worked in Applied fields and interdisciplinary settings
What Knowledge, skills, abilities and other attributes are required to do the role competently?	An inquisitive nature and a concern for accuracy is the main attribute required to be in this field. They must have keen observation, intelligence, an eye for detail, ability to work along with a team, a logical, practical and methodical approach. An aptitude for scientific analysis is essential.
Industries that typically hire such skills	In government sector, particularly in various law enforcement agencies such as police, legal system, the investigative services of the central government and state governments. A major chunk of trained forensic scientists are hired by the Intelligence Bureau (IB), the Central Bureau of Investigation (CBI), etc. Another interesting career, rather the most attractive option for forensic scientists is teaching in institutes which impart education in forensic science.
Fixed work hours?	No.
Day job or work in shifts	No Pre defined shifts
Social Standing of role	High. The rapid growth in urbanization and industrialization, has badly disturbed and destroyed the balance of our environment, as a result of which there has been unsustainable growth and development. There is a huge responsibility on the part of the environmentalist or environmental scientists to propose several environment friendly processes of development.
Impact on society	High. It plays a major role in the flow of justice.
Availability of job opportunities (Current/Future)	High. Though there are plenty of job options for forensic scientists, the major flaw of making a career in it is that most of the jobs come from the government and if someone fails to get a job within a prescribed age there are not many options for such a person; therefore, it seems a tad risky. The work profile or nature of job is tiring which can take toll on the forensic scientist. Working odd and long hours can be difficult. The work of a forensic scientist hovers around the crime scenes which may at times be stressful and emotionally draining. However, stress and emotional distress are part of almost every job so these cannot be considered a constraint to work as forensic scientist
Location	Cities
Travel	Yes.
People/Customer facing role	Yes. This role requires person to work in a team.
Skill focus- People or Cognitive skills	Both. This role requires both people skills and cognitive skills as they need to communicate scientific and technical information for the analysis.

Occupation	Teacher
Field	Education
Required Educational Qualification or Certification	D.Ed, B.Ed. M.Ed, M Phil
Role Objective/ Tasks	To teach and educate students according to educational needs, guidelines provided and abilities of individual students
Work Environment	Normal - Inside a school/training Centre
What Knowledge, skills, abilities and other attributes are required to do the role competently?	1) Teachers must be able to understand subject matter; learn, select, and use teaching strategies appropriate to the level, ability, and interests of the students in the class. 2) Teachers must be able to communicate effectively with students, teachers, aides, principals, parents. They must be able to speak with appropriate volume, vocabulary so as to be readily understood. 3) Teachers must demonstrate the emotional stability, must be able to “read” and understand different social situations, and communicate effectively in social interactions. 4) Teachers must be able to develop rapport with students and appropriate relationships with others in schools 5) Compassion, integrity, concern for others, interpersonal skills, and motivation are expected of teachers
Industries that typically hire such skills	Govt/Pvt schools, colleges, NGOs, Training/Coaching institutes
Fixed work hours?	Yes
Day job or work in shifts	Day Job
Social Standing of role	High. Teachers are highly respected in the society
Impact on society	High. The role of the teacher in shaping the future of our society is very high
Availability of job opportunities (Current/Future)	High. Education section is a very fast growing sector and there are many opportunities in both Private and Public education sectors
Location	Local options available but transferable job
Travel	Infrequent
